- The introduction of substitutes for modern building materials and chemicals in the markets in which we operate and the development of new construction techniques could have an adverse effect on our business, results of operations and financial condition.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on pages 26, 116 and 214, respectively, of this Draft Prospectus. SECTION II - RISK FACTORS

An investment in equity shares involves a high degree of risk. Investors should carefully consider all the information in the Draft Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares, but also to the industry in which we operate or to India. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition. If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with “Our Business”, “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 116, 161 and 214, respectively of this Draft Prospectus, as well as the other financial and statistical information contained in this Draft Prospectus. In making an investment decision, prospective investors must rely on their own examination of us and our business and the terms of the Issue including the merits and risks involved. Potential investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section.

This Draft Prospectus also contains certain forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. For further information, please see “Forward-Looking Statements” on page 16 of this Draft Prospectus.

Unless otherwise indicated, the financial information included herein is based on our Restated Financial Statements included in this Draft Prospectus. For further information, please see “Restated Financial Statements” on page 161 of this Draft Prospectus. We have, in this Draft Prospectus, included various operational and financial performance indicators, some of which may not be derived from our Restated Financial Statements and may not have been subjected to an audit or review by our Statutory Auditors. The manner in which such operational and financial performance indicators are calculated and presented, and the assumptions and estimates used in such calculation, may vary from that used by other companies in same business as of our Company in India and other jurisdictions. Investors are accordingly cautioned against placing undue reliance on such information in making an investment decision and should consult their own advisors and evaluate such information in the context of the Restated Financial Statements and other information relating to our business and operations included in this Draft Prospectus.

The industry and market information contained in this section has been derived from a report titled “Industry Research Report on Construction & Construction Chemicals industry” dated June 2022, prepared by Care Advisory Research and Training Limited which was appointed by our Company vide engagement letter dated May 11, 2022 and has been exclusively commissioned and paid for by our Company in connection with the Issue. (“CareEdge Report”) Unless otherwise indicated, industry and market data used in this section has been derived from industry publications and other publicly available information, including, in particular CareEdge Report. Unless otherwise indicated, all financial, operational, industry and other related information derived from CareEdge Report and included herein with respect to any particular year refers to such information for the relevant calendar year.

Internal Risk Factors

Risks relating to our Business

1. ***We source raw materials from third parties and the quality of our modern building materials may be impacted by the quality of the raw materials supplied by third parties.***

We source raw materials from third party suppliers. In the manufacturing process, finished raw materials have been processed and are ready to be mixed or processed with other products to form the final product that is sold to the end-user. We do not have oversight of the manufacturing and quality control processes of our suppliers. While we seek to carry out our own quality control of these products when they are delivered, there is no guarantee that we will be able to successfully detect any faults or issues, especially if these are latent or not obvious upon a physical examination. Use of any defective or low-quality raw materials in our

production process may adversely affect the safety, function, durability and strength of our modern building material products. This can result in product contaminations and defects, producing consumer complaints and negative publicity. An inability to maintain the established standards of our business could negatively impact customers' perceptions of our offerings as they may find the quality of our modern building material products to be inconsistent and hence, unreliable. The sales and performance of our modern building material products could suffer as a result.

2. ***We have historically derived, and may continue to derive, a significant portion of our income from our top 5 customers.***

Our top 5 customers represented 61.57%, 58.48%, 76.40% and 83.97%, respectively, of our revenue from operation for three months period ended June 30, 2022 and for Fiscals 2022, 2021 and 2020, respectively. We typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

3. ***An inability to protect, strengthen and enhance our existing brands, and successfully launch and market new brands, could adversely affect our business prospects and financial performance.***

Our business reputation and the brands under which we sell products include "MCON Magic Coat WP", MCON MORTAR/NSA Grey, MCON Block Fix /Block Mortar, MCON Wall Putty and others are critical to the success of our business as they serve in attracting customers to our products in preference to those of our competitors. However, various factors, some of which are beyond our control, are critical for maintaining and enhancing our brand, which may negatively affect our brand if not properly managed. These include our ability to, effectively manage the quality of our products and address customer grievances, increase brand awareness among existing and potential customers, adopt new technologies or adapt our systems to user requirements or emerging industry standards, and protect the intellectual property related to our brands.

Our brands could also be harmed if our services fail to meet the expectation of our customers, if we fail to maintain our established standards or if we become the subject of any negative media coverage. Any allegations of product defects even when false or unfounded, could tarnish the image of our brands and may cause our customers to choose other products. Consequently, product contaminations and defects, consumer complaints or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding and marketing initiatives and adversely affect our business and prospects.

In addition, in Fiscals 2022, 2021 and 2020, we launched eight new and innovative products and in the current fiscal itself we have launched the following products under our MCON brand:

MCON CI 300: Corrosion Inhibiting Concrete Admixture - Bipolar corrosion inhibiting admixture in liquid form for reinforced concrete and mortar.

MCON EPOXY SBA: Epoxy Adhesive for Segmental Bridge – This is a solvent free thixotropic two-part epoxy adhesive for bonding prefabricated concrete bridge segments.

MCON 2K EPOXY PRIMER: Epoxy Primer - This is a two component, epoxy-based primer is suitable for priming concrete / metal surfaces, including walls, prior to the application of any epoxy flooring, epoxy coating and epoxy repair mortar.

There can be no assurance that these brands will gain market acceptance or meet the requirements of our customers seeking premium products. The success of our new products and brands depends on our ability to effectively execute marketing initiatives to deepen the presence of our brands and differentiate ourselves from competition. Our marketing and business promotion efforts may be costly and may fail to effectively

enhance our brand or generate additional revenues. Our failure to develop, maintain and enhance our brand may result in decreased revenue and loss of customers, and in turn adversely affect our business, financial condition and results of operations.

4. ***Our business is subject to seasonal variations and cyclicity that could result in fluctuations in our results of operations.***

The Indian construction industry is cyclical and seasonal in nature. In recent years, modern building materials and chemicals prices and profitability of its manufacturers have fluctuated significantly in India, determined by overall supply and demand. A number of factors influence supply and demand for modern building materials and chemicals, including production capacity, general economic conditions, in particular activity levels in certain key sectors such as housing and construction, our competitors' actions and local, state and central government policies, which in turn affect the prices and margins that we and other modern building materials and chemical manufacturers can realise. To the extent it does, our business and results of operations may be materially and adversely impacted. Our business is subject to seasonal variations on account of lower demand for modern building materials and chemicals during the monsoon season. Consequently, our revenues recorded during the months of June to September could be relatively lower compared to other periods. During the monsoon season, construction activity is curtailed and we may continue to incur operating expenses, but our revenue from the sale of our products may be delayed or reduced. We utilise this period of subdued demand to plan the annual shutdown and maintenance of our manufacturing units in order to improve efficiency during peak periods. However, as a result of such fluctuations, our sales and results of operations may vary by fiscal quarter, and the sales and results of operations of any given fiscal quarter may not be relied upon as indicators of the sales or results of operations of other fiscal quarters or of our future performance. The level of construction activity in local and national markets is inherently cyclical, being influenced by a wide variety of factors including global and national economic circumstances, governments' ability to fund infrastructure projects, consumer sentiment and other factors beyond our control. As a result, any adverse developments in such industries could adversely affect our business and results of operations.

5. ***The modern building materials and chemicals industry is capital intensive, and we may need to seek additional financing to support our growth strategies. Any failure to raise additional financing could have an adverse effect on our business, results of operations, financial condition and cash flows.***

The modern building materials and chemicals industry is capital intensive. We require a substantial amount of capital to build and maintain our manufacturing units, purchase equipment and develop and implement new technologies in our manufacturing facilities. If our internally generated capital resources and available credit facilities are insufficient to finance our capital expenditure and growth plans, we may, in the future, have to seek additional financing from third parties, including banks and financial institutions.

Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we are unable to obtain such financing in a timely manner, at a reasonable cost and on acceptable terms, we may be forced to delay our expansion plans, downsize or abandon such plans, which may materially and adversely affect our business, financial condition and results of operations, as well as our future prospects.

6. ***We will continue to depend on our distribution network for the sale and distribution of our products. Any disruption in our distribution network will adversely affect our business and results of operations.***

We distribute our products through our distribution network. Our future growth depends on expanding our sales and distribution network to enter new markets and regions in India, and through different sales and distribution channels. Our orders for sales to dealers are typically placed on a regular basis, the terms of which may be modified in case of any price changes, and such dealers place orders for products based on prices, availability and the quality of products offered. As a result, we rely and will continue to rely to a significant extent on the relationships we have with our dealers. Further, as our authorised dealers have day-to-day contact with customers, we are exposed to the risk of our dealers failing to adhere to the standards set for them in respect of sales and after-sales service, which in turn could affect our customers' perception of our brand and products. In addition, if our competitors provide better commissions or incentives to our dealers, it could result in them favoring the products of other modern building materials and chemicals

manufacturers including our direct competitors. Further, our competitors may have exclusive arrangements with their dealers who may be unable to stock and distribute our products, which may limit our ability to expand our distribution network. Our ability to grow and expand our product reach significantly depends on the reach and effective management of our distribution network. In the event we fail to engage adequate dealers, or fail to establish relationships with new dealers, our sales volumes may be affected which will have an adverse effect on our business and results of operation.

7. ***Unsecured loan taken by our Company from our Promoter, Mahesh Ravji Bhanushali and Directors, Chetan Ravji Bhanushali and Puja Mahesh Bhanushali can be recalled at any time.***

As on October 31, 2022, unsecured loan taken by our Company stood at ₹ 79.88 Lakhs. The unsecured loan taken by our Company from our Promoter, Mahesh Ravji Bhanushali and Directors, Chetan Ravji Bhanushali and Puja Mahesh Bhanushali may be recalled at any time. For further details, see “*Financial Indebtedness*” beginning on page 212. In the event that any lender seeks a repayment of any such loan, we would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. We may not have adequate working capital to meet business requirements of our Company, and, as a result, any such demand by the lenders may affect our business, cash flows, financial condition and results of operations. Further, in respect of such unsecured loan, no proper agreement has been executed between the parties.

8. ***Our inability to collect receivables and default in payment from our dealers or customers could result in reduced profits and affect our cash flows.***

In our modern building materials and chemical sales through dealers, we strive to operate on advance and secured payment terms for the non-trade segment. For our trade segment, payments are secured with dealer deposits, and any outstanding amount over the dealer deposit will be assigned for recovery. However, there is no guarantee that our dealers will not default on their payments. Our inability to collect receivables from our dealer and customers in a timely manner or at all, could adversely affect our working capital cycle and cash flow. Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers, and as a result could cause customers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements. Any such increase in our receivable turnover days will negatively affect our business.

9. ***The introduction of substitutes for modern building materials and chemicals in the markets in which we operate and the development of new construction techniques could have an adverse effect on our business, results of operations and financial condition.***

Various alternative materials such as plastic, aluminium, glass, wood and steel can be used in construction as substitutes. In addition, other construction techniques, such as the use of dry wall, could decrease the demand for our products. Further, new construction techniques and modern materials may be introduced in the future. The increase in use of substitutes for modern building materials and chemicals could cause a significant reduction in the demand and prices for our modern building materials and chemicals products and have an adverse effect on our business, results of operations and financial condition.

10. ***Changes in technology may affect our business by making our manufacturing facilities less competitive.***

Our business is continually changing due to technological advances and scientific discoveries. Our profitability and competitiveness are in large part dependent on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. Changes in technology may make newer generation manufacturing equipment more competitive than ours or may require us to make additional capital expenditures to upgrade our manufacturing facilities. Although we strive to maintain and upgrade our technologies, facilities and machinery consistent with current national standards, the technologies, facilities and machinery we currently use may become obsolete. We need to continue to invest in new and more advanced technologies and equipment to enable us to respond to emerging industry standards and practices in a cost-effective and timely manner that is competitive with other modern building material companies and other methods of manufacturing. The development and implementation of such technology entails technical and business risks. We cannot assure you that we will be able to successfully implement new technologies or adapt our processing systems to customer requirements or emerging industry standards. If we are unable to adapt in a timely manner to changing

market conditions, customer requirements or technological changes, our business and financial performance could be adversely affected.

Further, materials such as plastic, aluminium, glass, wood and steel can be used in construction to substitutes. In addition, other construction techniques, such as the use of dry wall, could decrease the demand for our products. Further, new construction techniques and modern materials may be introduced in the future. The increase in use of substitutes could cause a significant reduction in the demand and prices for our products and have an adverse effect.

11. ***The success and wide acceptability of our products is largely dependent upon certain quality accreditations which are valid for a limited time period and to maintain an effective quality control system. An inability to ensure the renewal of these quality accreditations in a timely manner or at all may adversely affect our business prospects and financial performance.***

Our business requires obtaining and maintaining quality certifications and accreditations from independent certification entities. We have obtained certifications viz. ISO 9001:2015 (QMS), ISO 14001:2015 (EMS) and ISO 45001:2018 (OHSMS) for manufacture and supply of construction & water proofing chemicals and paints in respect of our Unit I. We have also obtained IS 15477:2019 for Adhesive for use with ceramic, mosaic and stone tiles and IS 2645:2003 for Integral waterproofing compounds for cement, mortar and concrete. Further, we have obtained the Certificate of Compliance for our products, MCON Mortar, MCON NSA Grey Gold, MCON NSA Grey No Limit, MCON NSA White, MCON NSA White Gold, MCON NSA White No Limit and MCON LW, identified by the symbol “CE”. Such specifications and standards of quality are an important factor in the success and wide acceptability of our products. If we fail to comply with applicable quality standards or if the relevant accreditation institute or agency declines to certify our products, or if we are otherwise unable to obtain such quality accreditations in the future, within time or at all, our business prospects and financial performance will be materially and adversely affected.

The quality of our products is critical to the success of our business, and quality depends on the effectiveness of our quality control system, which, in turn, depends on a number of factors, including the design of our system, our quality control training program, and the implementation and application of our quality control policies and guidelines. Any significant failure or deterioration of our quality control system could result in defective or sub-standard products, which, in turn, may result in delays in the delivery of our products and the need to replace defective or substandard products. As a result, our reputation, business, results of operations and financial condition could be materially and adversely affected.

12. ***Information relating to the installed production capacity and capacity utilisation of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates and future production and capacity may vary.***

Information relating to the installed production capacity and capacity utilisation of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates of our management in the calculation of the installed production capacity, actual production and capacity utilisation of our manufacturing units. These assumptions and estimates include the standard capacity calculation practice, grinding capacity and other ancillary equipment installed at the plant and the calculations and explanations provided by our management. While such assumptions and estimates may have been based on conservative calculations, actual production capacity, production levels and utilisation rates may still vary from the information included in this Draft Prospectus or from the historical installed production capacity information of our manufacturing units depending on the product type. Undue reliance should therefore not be placed on our historical installed capacity, actual production and capacity utilisation for our existing manufacturing facilities included in this Draft Prospectus. For further details, see “*Our Business - Capacity and Capacity Utilisation*” on page 130.

13. ***Our Company has not entered into long-term agreements for the supply of raw materials with our suppliers. We are subject to uncertainties in the supply of raw materials and there is no assurance that our suppliers will continue to sell raw materials to us as per our requirements. This could impact the business and financial performance of our Company.***

Cement, sand and certain chemicals are some of raw materials used by us for manufacturing our modern building materials and chemical products. Our practice has been to place orders considering the demand-supply position which is also an industry practice. As a result, our suppliers can terminate their relationships

with us due to a change in preference or any other reason on immediate basis, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in the supply of raw materials. Our suppliers are under no obligation to accept our orders and may also cancel, reduce or delay orders. The orders placed by us are dependent on factors such as demand for our Company's products, customer's inventory management, amongst others. Our suppliers in turn are also dependent on factors such as fluctuation in demand, supplier's inventory management and pricing amongst others.

Although, we lay strong emphasis on quality, timely delivery of raw materials and personal interaction by our senior management with suppliers, any change in the price of raw materials and preference of suppliers can adversely affect the business and the profitability of our Company.

14. ***We may be unable to adequately protect our intellectual property and may be subject to risks of infringement claims.***

We own and registered trade mark  and  of our brand under the Trade mark Act, 1999. respectively all are marked for examination and we may face possible objections from third parties and potential rejection from the trademarks authority with respect to some of our applications. Our Company has filed ten (10) new trademark applications for registration of trademarks including our brand names such as “MCON- Maarvel” “MCON LW “, “MCON MAGIC COAT” , “MCON SUPER HACK” , “MCON SUPER TUFF ”, “MCON HARD FLOOR (NON-METALLIC)”, “MCON TOPFLOOR, “MCON NSG 60”, “Trusted Partner in Construction Chemicals” out of which the trademark registry have objected three (3) trademarks and rest of the trademarks are pending for hearing. There can be no assurance that we will be able to successfully obtain or renew our registration in a timely manner or at all, which may affect our ability to use the brand in the future. We may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted.

The measures we take to protect our intellectual property include relying on Indian laws and initiating legal proceedings, which may not be adequate to prevent unauthorised use of our intellectual property by third parties. We may also incur significant costs in connection with legal actions relating to such rights. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations and financial condition. Our failure to detect counterfeiting or imitation of our own brand products and trademarks and to mitigate the adverse impact from such counterfeiting and imitation could result in a decrease in our sales volume or market share.

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights, which may force us to alter our offerings. We may also be susceptible to claims from third parties asserting infringement and other related claims. If similar claims are raised in the future, these claims could result in costly litigation, divert management's attention and resources, subject us to significant liabilities and require us to enter into potentially expensive royalty or licensing agreements or to cease certain offerings. Any of the foregoing could have an adverse effect on our business, results of operations and financial condition.

15. ***If we are unable to successfully implement our proposed expansion plans, our results of operations and financial condition could be adversely affected.***

We continue to seek to increase the supply of our modern building materials and construction chemicals and strengthen our position in the industry. We have already acquired land at Ambethi, Valsad, Gujarat and construction of the new unit is in full swing. We plan to develop two manufacturing lines dedicated to manufacture our entire range of Powder and Liquid products.

The expansion of our existing capacity would involve risks, including risks associated with the timely completion of the expansion, and our failure to adequately manage these risks notwithstanding our operational and financial systems, procedures and controls could have a material adverse effect on our business, financial condition, results of operations and prospects. Factors that could affect our ability to complete the expansion on time, include completing the expansion / civil construction, receiving the machineries of desired quality and on the scheduled time, a decline in demand for our products and general

economic conditions. We may have to revise our schedule of implementation and completion of these expansion projects on account of a various factors including delay in the Issue process, market conditions, negotiation with suppliers and other external factors. This may entail rescheduling of implementation of these proposed expansion projects.

Our expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce.

We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans. Further, there can be no assurance that we will be able to execute our strategies on time and within the budget estimated by our Company.

16. ***We have substantial working capital requirements. Our inability to obtain and / or maintain sufficient cash flow, credit facilities and other sources of funding in a timely manner to meet our requirements of working capital or payment of our debts, could adversely affect our operations.***

Our business requires significant amount of working capital. We require significant amount of our working capital for purchasing key raw materials. Though, presently we have sanctioned working capital limits from the existing lenders and our Objects of the Issue is to meet our future working capital requirements, we may need additional debt in the future to satisfy our working capital needs.

The working capital requirement for Financial Year 2023 is estimated at ₹ 895.47 lakhs. An amount of ₹ 400 lakhs towards working capital requirements will be funded out of the Issue Proceeds, whereas the balance, if any, would be arranged from our internal accruals and/or loan funds. For further details, please see “*Objects of the Issue*” beginning on page 74 of this Draft Prospectus.

We strive to maintain strong relationships with banks and non-banking financial institutions to increase our financing flexibility. Our credit profile often enables us to obtain financing on favourable terms from financial institutions. However, we cannot assure you that our relationships with lenders will not change or that lenders will continue lending practices we are familiar with. Our lenders may implement new credit policies, adopt new pre-qualification criteria or procedures, raise interest rates or add restrictive covenants in loan agreements, some or all of which may significantly increase our financing costs, or prevent us from obtaining financings totally. As a result, our manufacturing process may be subject to significant delays and cost overruns, and our business, financial condition and results of operations may be materially and adversely affected. For further details on provisions made for bad debts, see the “*Restated Financial Statements*” beginning on page 74 of this Draft Prospectus. All of these factors may result in an increase in the amount of our receivables and short-term borrowings and the continued increase in working capital requirements may have an adverse effect on our financial condition and results of operations.

17. ***The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled “Objects of the Issue”. Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.***

Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time on account of various factors such as our financial and market condition, business and strategy, which may not be within the control of our management. Our estimates may exceed the value and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the Objects of the Issue is entirely at the discretion of our management. However, monitoring the utilisation of the Net Proceeds and the Board after consideration and approval by the Audit Committee will disclose the utilisation of Net Proceeds under separate head in our balance sheet along with relevant details for all sum amounts that have not been utilized. Our Company will issue a disclosure to the Stock Exchanges on a half-yearly basis, deviations, if any, in the Use of Proceeds of the Issue as per Objects of the Issue stated in this Draft Prospectus or by way of an explanatory statement to the notice for a general meeting.

18. ***In the event we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.***

Our operations are subject to extensive government regulations and we are required to obtain and maintain a number of statutory and regulatory permits and approvals under central, state and local government rules in India, generally for carrying out our business. While we have not obtained certain approvals required for manufacturing operations at our manufacturing unit located at Chikli, Navsari. For further details, see “Government and Other Approvals” on page 229. Further, we may need to apply for more approvals, including the renewal of approvals which may expire from time to time, and approvals in the ordinary course of business. Any inability to renew these approvals may have an adverse effect on our operations. We cannot assure you that such approvals will be issued or granted to us, or at all. If we fail to obtain or retain any of these approvals or licenses or renewals thereof, in a timely manner or at all, our business may be adversely affected.

The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer disruption in our operations, any of which could adversely affect our business.

19. ***Our manufacturing units are situated in Sarigam, Valsad and Chikli, Navsari in state of Gujarat and our operations may be affected by various factors associated with the region where we operate.***

Our manufacturing units are located at Sarigam, Valsad and Chikli, Navsari in state of Gujarat. Since we have our manufacturing units in western India, we are subjected to various risks, including but not limited to the following risks:

- economic slowdown in western India;
- regional natural disasters;
- vulnerability to change of policies, laws and regulations or the political and economic environment of western India;
- constraints on our ability to diversify across states; and
- perception by our potential clients, that we are a regional modern building materials and construction chemicals manufacturing company, which hampers us from competing against other large modern building materials and construction chemicals manufacturing companies at a national level.

Since our manufacturing operations are concentrated in Gujarat, any political disruptions, natural calamities or civil disruptions, opposition and protests, particularly in locations where we operate, could adversely affect our business operations or strategy. There is no assurance that such disruption in business operations would not bring any hindrance in the functioning of our manufacturing units. Consequently, our business, results of operations, cash flows and financial condition have been and will continue to be heavily dependent on the performance of, and the prevailing conditions affecting the western states of Maharashtra, Gujarat, Madhya Pradesh and other geographically contiguous states.

20. ***We have experienced negative cash flows in the past and may continue to do so in the future and the same may adversely affect our cash flow requirements, which in turn may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.***

We have experienced negative net cash flows from operating, investing and financing activities in the past and may continue to experience such negative operating cash flows in the future. The following table sets forth certain information relating to our cash flows on a restated basis for the periods indicated:

(₹ in lakhs)

Particulars	For three months period ended June 30, 2022	FY 2022	FY 2021	FY 2020
Net cash (used in)/	33.39	(195.83)	(1.68)	(56.85)

Particulars	For three months period ended June 30, 2022	FY 2022	FY 2021	FY 2020
generated from operating activities				
Net cash generated from/ (used in) Investing Activities	(27.33)	(149.38)	(29.45)	(10.92)
Net cash generated from/ (used in) Financing Activities	(4.10)	348.56	34.01	62.73

Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see “*Restated Financial Statements*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on pages 161 and 214, respectively.

21. ***Conflict of interest may arise out of common business objects shared by our Company and our Promoter group entity which may lead to real or potential conflicts of interest with our business.***

Our Promoter group entity, namely M/s. R.K Traders is in the business of trading in modern building materials and construction chemicals. Our Company manufactures modern building materials and construction chemicals. Though, presently, our Promoter group entity, namely M/s. R.K Traders deals into these modern building materials and construction chemicals manufactured by our Company, we cannot assure you that our Promoter group entity, will not compete with our existing business or any future business that we may undertake or that its interests will not conflict with ours. Further, in cases of conflict, there can be no assurance that our Promoter or Directors will not favour any of their interests in such other business. Any such future conflict, or situations where our Promoter or Directors decide to divert opportunities or conduct business through their other business interests, could have a material adverse effect on our business, reputation, results of operations, financial condition, and cash flows.

22. ***Our Company has in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.***

Our Company has entered into related party transactions with our Promoter and Promoter Group Entities in the past. While our Company believes that all such transactions have been conducted on an arm’s length basis and are accounted as per Ind AS 24, however there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

23. ***Our agreements with banks and financial institutions for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.***

We have entered into agreements for short term and long-term borrowings with certain banks and financial institutions. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as to obtain either the prior written consent of such financial institutions or require us to give prior written intimation to such lenders, prior to, amongst other circumstances, prepayment of the outstanding principal amounts of the facilities availed by our Company; any amalgamation, demerger, merger, acquisition, corporate or debt restructuring; undertake any project, implementation of any scheme of expansion/ diversification or capital expenditure; invest by way of share capital or lend/ advance funds or place deposits with any other entity; undertake any guarantee obligation on behalf of any other company; any change in the constitution or remuneration of management, control, ownership, shareholding pattern, capital structure, profit sharing and/or management of our Company; and declaration or payment of dividend. Our ability to execute business plans, including our ability to obtain additional financing on terms and conditions acceptable to us, could be negatively impacted as a result of these restrictions and limitations. In the event of breach of a restrictive covenant, our lender could deem us

to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew borrowings as needed for the smooth conduct of our operations and pursue our growth initiatives. Although we have received consent from our lender for the Issue, we cannot assure you that we will be able to receive such consents in future for other growth plans. For further details, see 'Financial Indebtedness' beginning on page 212.

24. ***Our Promoter and some of our Directors have provided personal guarantees for our loans and any failure or default by us to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations, which may adversely affect our Promoters' ability to manage our affairs.***

Our Company has availed loans and facilities in the ordinary course of its business for inter alia meeting working capital, capital expenditure and other business requirements. Our Promoter and some of our Directors has given personal guarantees in relation to certain of our loans. For further details of our borrowings, please see "Financial Indebtedness" on page 212. Our Promoter and Directors may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by our Promoter or our Directors may be invoked, which could negatively impact the reputation and net worth of our Promoter and Directors. In addition, our Promoter may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company. Furthermore, in the event that our Promoter withdraws or terminates his guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

25. ***We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in delay or abandonment of our business plans and this may have an adverse effect on our growth and operations.***

We may require additional funds in connection with future business expansion and development initiatives. In addition to the net proceeds of this Issue and our internal accruals, we may need other sources of funding to meet these requirements, which may include entering into new debt facilities with lending institutions. If we decide to raise additional funds through the issuance of debt, our interest obligations will increase, and we may be subject to additional covenants. Such financing could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in delay or abandonment of our business plans and this may have an adverse effect on our future growth and operations.

26. ***There are outstanding legal proceedings involving our Company which may adversely affect our business, financial condition and results of operations.***

There are proceedings pending at different levels of adjudication before various courts, enquiry officers and appellate forums. Such proceedings could divert management's time, attention and consume financial resources in their defence. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. A summary of the outstanding proceedings involving our Company as disclosed in this Draft Prospectus, to the extent quantifiable, have been set out below:

(₹ in lakhs)

*To the extent quantifiable

Orders passed in such proceedings adverse to our interests may affect our reputation and standing and may have a material adverse effect on our business, results of operations and financial condition. For further details, please see "Outstanding Litigation and Material Developments" beginning on page 225 of this Draft Prospectus.

27. *Developments in the competitive environment in the modern building materials and construction chemicals industry, such as consolidation among our competitors, could have a material adverse effect on our competitive position and hence our business, financial condition, results of operations or prospects.*

We believe that the key competitive factors affecting our business include product quality, capacity creation and utilization, workforce skill and productivity, operating costs, pricing power with our buyers, access to funding, the degree of regulation and access to a regular supply of raw materials. We cannot assure prospective investors that we will be able to compete effectively against our current or emerging competitors with respect to each of these key competitive factors. In the past, there have been instances of consolidation among our competitors. Competition from modern building materials and construction chemicals manufactures with expanded production capacities and new market entrants could result in significant price competition, declining margins and a reduction in revenue. For example, these companies may be able to negotiate preferential prices for certain products or receive discounted prices for bulk purchases of certain raw materials that may not be available to us.

Further, changes in India's debt restructuring and insolvency laws, including the Insolvency and Bankruptcy Code, 2016, has led to consolidation among our competitors. In addition, our competitors may have lower leverage and/ or access to cheaper sources of funding. Larger competitors may also use their resources, which may be greater than ours, against us in a variety of ways, including by making additional acquisitions, investing more aggressively in product development and capacity and displacing demand for our products. The market is still highly fragmented, and if the trend towards consolidation continues, we could be placed in a disadvantageous competitive position relative to other plastic product producers and our business, results of operations, financial condition and prospects could be materially and adversely affected. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete.

28. *Our success largely depends upon the services of our senior management and other Key Managerial Personnel (KMP) and our ability to attract and retain them. Demand for senior management personnel in the industry is intense and our inability to attract and retain our KMP may affect the operations of our Company.*

Our Key Managerial Personnel have substantially contributed for our growth. Our success is substantially

dependent on the expertise and services of our Directors and Key Managerial Personnel. They provide expertise which enables us to take well informed decisions in relation to our business and prepare our Company for future challenges. Our future performance will depend upon the continued services of these persons. Demand for senior management personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

29. ***We do not own the land on which our manufacturing unit at Sarigam, Valsad and Chikli, Navsari in state of Gujarat have been set-up. Any revocation or adverse changes in the terms of the lease may have an adverse effect on our business, prospects, results of operations and financial condition.***

We have entered into lease/leave and license agreements with GIDC, Sarigam and a private land owner at Chikli, Navsari for our manufacturing units in state of Gujarat. Though our lease agreement with GIDC-Sarigam is on a long-term basis and is subject to us complying with its terms and conditions, in the event of GIDC, Sarigam revoking the lease agreements or imposing terms and conditions that are unfavorable to us, we may suffer a disruption in our operations or have to pay increased rent, which could have a material adverse effect on our business, prospects, results of operations and financial condition. Post our expansion plans for the new unit at Ambethi, Valsad, Gujarat, we will cease operations at the Chikli, Navsari manufacturing unit.

For further details, see the section titled “*Our Business — Immovable Property*” on page 134.

30. ***Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/ or surplus of products, which could harm our business.***

We monitor our inventory levels based on our own projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we make production decisions well in advance of sales. An inaccurate forecast of demand for any product can result in the unavailability/surplus of our products. This unavailability of our products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of our products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially and ultimately create write-offs of inventory. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

31. ***Our inability to respond adequately to increased competition may adversely affect our business, financial condition and results of operations.***

We face competition from various domestic manufacturers and dealers. Competition emerges from organised as well as unorganised players in the modern building materials and chemicals industry. The organised players in the industry compete with each other by providing high quality, consistent and time bound products, customization and innovation. We have a number of competitors offering products similar to us. We ensure the product quality, timely delivery, product innovation, customization in products which helps us to maintain strong relationship with our customers which in turn provides edge over our competitors. We intend to continue competing vigorously to increase our market reach and sales volumes to manage our growth in an optimal way. Certain of our competitors may have better access to financial resources, technology, research and development capability, market reach and operations in different geographies and diversified product portfolios, which may allow them to better, respond to market trends. Accordingly, we may not be able to compete effectively with our competitors across our product portfolio, which may have an adverse impact on our business, financial condition, results of operations and future prospects. For further details, please see “*Our Business - Competition*” on page 132.

32. ***In the event of any accident at our manufacturing units, our Company may be held liable for damages and penalties which may impact the financials of our Company.***

Any mishandling of our equipment and machineries by our employees/ labour could also lead to serious and sometimes fatal accidents. These accidents can cause personal injury and loss of life, severe damage to and destruction of property and equipment, environmental damage and may result in the suspension of

operations and the imposition of civil and criminal liabilities. We have taken group mediclaim policy covering our employees. While we believe that the insurance coverage maintained by us would be reasonably adequate to cover the normal risks associated with such accidents, to the extent that we suffer loss or damage for accidents for which our insurance is inadequate or which exceeds our insurance coverage, the loss would have to be borne by us. Such accidents have the potential to adversely impact our financial position, our reputation with suppliers, customers, regulators, employees and the public, which could in turn affect our financial condition and business performance.

For further details, see the section titled “*Our Business — Insurance*” on page 133.

33. ***Our inability to continue to obtain equipment and ancillary services from our key suppliers could affect our business and results of operations.***

We are depend on third-party suppliers, vendors and other partners to provide the necessary equipment and services that we will need for our continuing operations. We cannot assure you that we will be able to continue to obtain equipment on commercially acceptable terms, or at all, or that our suppliers, vendors and partners will continue to enter into or honour the contracts for their services. Our inability to continue to obtain equipment and enter into contracts with our vendors in a timely manner, or at all, could adversely affect our business and results of operations.

34. ***Modern building materials and construction chemicals is a labour intensive industry, hence we may face labour disruptions and other planned and unplanned outages that could interfere or temporarily disrupt our operations.***

Our Company’s activities are labour intensive. Strikes and other labour action may have an adverse impact on our operations, though we have not experienced any such labour disruption in the past. We cannot guarantee that we will not experience any strike, work stoppage or other industrial action in the future. Any such event could disrupt our operations either temporarily or for a significant period of time, resulting in increased wages and other costs leading to a material adverse effect on our business, results of operations or financial condition. For further details, please see “*Our Business – Manpower*” on page 132 of this Draft Prospectus.

35. ***Any reduction in the demand for our products could lead to underutilization of our manufacturing capacity. We may also face surplus production of a particular product due to various reasons including inaccurate forecasting of customer requirements, which could adversely affect our business, results of operations, financial condition and cash flows.***

We face the risk that our customers might not place any order or might place orders of lesser than expected size or may even cancel existing orders or make change in their policies which may result in reduced quantities being manufactured by us. Cancellations, reductions or instructions to delay production (thereby delaying delivery of products manufactured by us) by customers could adversely affect our results of operations by reducing our sales volume leading to a reduced utilization of our existing manufacturing capacity.

Further, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. The changes in demand for their products (which are in turn manufactured by us) could reduce our ability to estimate accurately future customer requirements, make it difficult to schedule production and lead to over production and utilization of our manufacturing capacity for a particular product. The requirements of our customers are not restricted to one type of product and therefore variation in demand for certain types of product also requires us to make certain changes in our manufacturing processes thereby affecting our production schedules. This may lead to over production of certain products and under production of some other products resulting in a complete mismatch of capacity and capacity utilization.

Therefore, there could be a significant difference in the installed capacity and the production of our products due to the variety of products that we manufacture. Certain products require lesser process time whereas certain products require more process time in the same manufacturing set-out that we have installed. Therefore, the information provided in this Draft Prospectus on installed capacities and the data on actual production may differ significantly.

Further, our installed capacity of manufacturing units is the maximum productive capacity according to the manufacturers' specification of machines / equipment whereas, our licensed capacity is the approved production capacity of our manufacturing units by pollution control authorities. Our utilised capacity signifies the volume of production achieved in relation to installed capacity.

If we are unable to utilise optimum level of our installed capacity of our manufacturing units in the future this could affect our cost and profitability and thereby adversely affect the financial condition of our Company. For further details of our production and capacity utilization, see, "*Our Business - Capacity and Capacity Utilization*" on page 130. Any under utilization of our manufacturing units could adversely affect our business, results of operations, financial condition and cash flows.

36. ***Prolonged stoppage of operations, including due to breakdown of machinery at our manufacturing facilities, blending units or grinding units, adverse weather conditions or industrial accidents may have a material adverse effect on our business, financial condition and results of operations.***

Our manufacturing facilities are subject to various operating risks, such as the breakdown or failure of equipment, disruptions in power supply, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes and lock-outs, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Additionally, we may be required to carry out planned shutdowns of our plants for maintenance, statutory inspections and testing, capacity expansion and equipment upgrades. The occurrence of any of these events and particularly, any significant malfunction or breakdown of our machinery, could significantly affect our operating results. Long periods of business disruption could also result in a loss of customers.

Our inability to effectively respond to adverse events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations or the under-utilisation of our manufacturing facilities which in turn may have an adverse effect on our business, results of operations and financial condition. Any prolonged shutdown of our units will significantly impact our operations.

37. ***Our Company provides transportation of its products by utilising third party fleet of commercial vehicles. Any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.***

Though, our business has not experienced any disruptions due to transportation in the past, any disruptions in transportation may have an adverse effect on the supplies from our suppliers and deliveries to our customers. These transportation facilities may not be adequate to support our existing and future operations. In addition, raw materials and products maybe lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials and products which may also affect our business and results of operation. An increase in the freight costs or unavailability of third party providers for transportation may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure and port facilities, or other events could impair the supply raw materials to our Units and our products to our customers. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

38. ***Our business and profitability will suffer if we fail to anticipate rapid changes in customer preferences and the industry on which we focus.***

To compete successfully in the industry, we must be able to identify and respond to changing demands and preferences, as well as operate within substantial production and delivery constraints. Changes in product mix impacts our sales and our gross margins. We cannot assure you that our products will always gain buyer acceptance and we will always be able to achieve competitive products to meet customer expectations. Failure to identify and respond to changes in consumer preferences could, among other things, limit our ability to differentiate our products, adversely affect consumer acceptance of our products, and lower sales and gross margins. Further, products that are developed by our competitors may render our offerings uncompetitive or force us to reduce prices, thereby adversely affecting our margins. Any of these factors could have a material adverse effect on our business and results of operations.

39. ***We are exposed to the risks of significant breaches of data security, and malfunctions or disruptions of information technology systems.***

We use “Tally” system which assists us with various business functions including sales, distribution, materials management, warehouse management and finance across all our offices and manufacturing units. We also use Spine HR for human resources management across our offices and manufacturing units. Although we carry out periodic security checks, these systems may be potentially vulnerable to data security breaches, whether by employees or others, which may result in unauthorized persons getting access to sensitive data. Though there have been no instances of security breaches in the past, inability to prevent such data security breaches in future could lead to the loss of trade secrets and the data related to our products and other proprietary information could be compromised. These systems are also susceptible to outages due to fire, floods, power loss, telecommunications failures, natural disasters, computer viruses or malware, break-ins and similar events. Effective response to such disruptions or malfunctions will require effort and diligence on the part of our third-party distribution partners and employees to avoid any adverse effect to our information technology systems.

For further details, please see “*Related Party Transactions*” under section titled “*Restated Financial Statement*” beginning on page 161.

40. ***Our Promoter and Promoter Group will continue to retain significant control in our Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.***

After the completion of this Issue, our Promoter and Promoter Group will continue to hold significant shareholding in our Company. As a result, our Promoter and Promoter Group will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting, and our other shareholders will be unable to affect the outcome of such voting. Our Promoter and Promoter Group may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders, such as actions which delay, defer or cause a change of our control or a change in our capital structure, merger, consolidation, takeover or other business combination involving us, or which discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. We cannot assure you that our Promoter and Promoter Group will act in our interest while exercising their rights in such entities, which may in turn materially and adversely affect our business and results of operations. We cannot assure you that our Promoter and Promoter Group will act to resolve any conflicts of interest in our favour. If our Promoter and Promoter Group sells a substantial number of the Equity Shares in the public market, or if there is a perception that such sale or distribution could occur, the market price of the Equity Shares could be adversely affected. No assurance can be given that such Equity Shares that are held by the Promoter will not be sold any time after the Issue, which could cause the price of the Equity Shares to decline. For further details, please see “*Capital Structure*” beginning on page 62.

41. ***The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.***

In late calendar 2019, COVID-19, commonly known as “novel coronavirus” was first reported in Wuhan, China. Since then the virus has progressively spread globally to many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorised the outbreak as a pandemic on March 11, 2020. In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-day lockdown on March 24, 2020, which, after being subject to successive extensions, certain restrictions were relaxed from June 8, 2020 and continue to be relaxed till date in a phased manner by both the Central and State Governments. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. Whilst the lockdown required private, commercial and industrial establishments to remain closed, manufacturing units of essential commodities like us were permitted to be functional. During the initial stages of the lockdown we faced limited availability of labour, supply chain constraints and logistical problems, thereby causing our

manufacturing units to operate at a sub-optimal capacity in the first quarter of FY 2021. We also faced limitation on transportation of our products from our manufacturing units and the operation of our offices were also adversely affected amidst the lockdown and public transport restrictions. There is no certainty if additional restrictions will be put back in place or if another lockdown would be imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such prolonged instances of lockdown may adversely affect our business, financial condition and results of operations. Further, our ability to ensure the safety of our workforce and continuity of operations while conforming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire manufacturing facility or our offices, as may be necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, offices, loss of life, injuries and impact the well-being of our employees.

The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in Western India, the eventual level of infections in India or in the regions in which we operate, and the impact of any actions taken by governmental bodies or health organisations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition.

42. ***Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and are also prohibited by the terms of our financing arrangements.***

The amount of our future dividend payments, if any, will depend upon factors that our Board deems relevant, including among others, our results of future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends. For further details on payment of dividend by our Company, please see “*Dividend Policy*” beginning on page 160.

43. ***Our insurance cover may not adequately protect us against all material hazards and accidents.***

Our operations are subject to accidents which are inherent to any manufacturing process such as risks of equipment failure, worker accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including accidents that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environment. Our operations are subject to various risks in the manufacturing industry. Accordingly, we maintain insurance policies for our manufacturing units, offices, buildings, plant and machinery, electrical installation, and stocks due to fire and other perils. Further, we have also maintained fire and burglary policy for our raw material, semi-finished goods and finished goods stored at our manufacturing units. We have also maintained insurance policies for our vehicles.

As on June 30, 2022, we maintain an insurance coverage of ₹ 200 lakhs representing 33% of our total net tangible assets and inventories. Further, our insurance policies may not be sufficient to cover the economic loss that we may have to suffer due to an unfortunate incident. While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, to the extent that we suffer loss or damage for events for which we are not insured or for which our insurance is inadequate or which exceeds our insurance coverage, the loss would have to be borne by us, and as a result, our results of operations and financial condition could be adversely affected. For further details, see the section titled “*Our Business — Insurance*” on page 133.

44. ***Any variation in the utilisation of our Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.***

We intend to use the Net Proceeds for various purposes, including but not limited to, (i) working capital requirement; and (ii) general corporate purposes. Further, the Net Proceeds are intended to be utilized by our Company only and none of our Promoter, Directors, Key Managerial Personnel or members of our Promoter Group will receive any portion of the Issue proceeds. The planned use of the Net Proceeds is

based on current conditions and is subject to changes in external circumstances, costs, other financial conditions or business strategies. For further details, see the section titled “*Objects of the Issue*” on page 74.

45. ***Industry information included in this Draft Prospectus has been derived from an industry report commissioned and paid by Company for such purpose. There can be no assurance that such third party statistical, financial and other Industry Information is either complete or accurate.***

We have availed the services of an independent third-party research agency, CARE Advisory Research and Training Limited (**CareEdge Research**) to prepare an industry report titled “*Industry Research Report on Construction & Construction Chemicals*” dated June 2022, (“**CareEdge Report**”) and has been exclusively commissioned and paid for by our Company in connection with the Issue and for purposes of inclusion of such information in this Draft Prospectus. The CareEdge Report is subject to various limitations and based upon certain assumptions that are subjective in nature including that the CareEdge Report is not based on comprehensive market research of the overall market for all possible situations, and that changes in socio-economic and political conditions could result in a substantially different situation than those presented. We have not independently verified data from these industry reports. Although we believe that the data may be considered to be reliable, the accuracy, completeness and underlying assumptions are not guaranteed and dependability cannot be assured. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies/peer companies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimate are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

46. ***There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.***

The Issue proceeds are entirely at the discretion of the issuer/management. As per SEBI ICDR Regulations, appointment of monitoring agency is required only if Issue size exceeds ₹ 10,000 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, as per the Section 177 of the Companies Act, 2013 the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

47. ***Our Registered Office is on leave and license basis. Failure to comply with the conditions of the use of such property could results in an adverse impact on our business and operations. Further there can be no assurance that this leave and license agreements will be renewed upon termination or that will be able to obtain other premises on lease on same or similar Commercial terms.***

Our registered office is situated at Office No: 101/A, Maxheal House, Bangur Nagar, Goregaon West Mumbai 400104, Maharashtra. We may not be able to successfully extend or renew such leave and license agreement upon expiration of the current term on commercially reasonable terms or at all and may therefore be forced to relocate our affected operations. This could disrupt our operations and result in relocation expenses, which could adversely affect our business, financial condition, results of operations and cash flows. In addition, we may not be able to locate desirable alternative sites for our operations as our business continues to grow or our leases near their end, and failure in relocating our affected operations could adversely affect our business and operations.

48. ***Our Promoter and certain members of Promoter Group and Directors hold Equity Shares in our Company and are therefore interested in the Company’s performance in addition to their normal remuneration and reimbursement of expenses.***

Our Promoter and certain members of our Promoter Group and Directors are interested in our Company, in addition to normal remuneration or benefits and reimbursement of expenses, to the extent of their shareholding or their relatives’ holding in our Company. Further, other than as disclosed in “*Restated Financial Statements*”, “*Our Management*” and “*Our Promoter and Promoter Group*” on pages 161, 142 and 157, there are no other transactions entered into by our Company with our Promoter, Promoter Group, Directors or Key Management Personnel While we believe that all such transactions have been conducted

on an arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties. For further information on the interest of our Directors, Promoter and Key Management Personnel, other than reimbursement of expenses incurred or normal remuneration or benefits, see "Our Management" and "Our Promoter and Promoter Group" beginning on pages 142 and 157, respectively.

49. ***We have issued Equity Shares during the last one year at a price that may be below the Issue Price.***

During the last one year we have issued Equity Shares at a price that may be lower than the Issue Price. For further details, see "Capital Structure" on page 62. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Price Band, Issue Price and the trading price of our Equity Shares after listing.

EXTERNAL RISKS

50. ***The Issue Price, market capitalization to total revenue multiple and price to earnings ratio based on the Issue Price of our Company, may not be indicative of the market price of the Equity Shares on listing or thereafter.*** "

The market price of the Equity Shares, market capitalization to total revenue multiple and price to earnings ratio based on the Issue Price may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. Consequently, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share price could fluctuate significantly because of market volatility. A decrease in the market price of our Equity Shares could cause investors to lose some or all of their investment.

51. ***A slowdown in economic growth in India could adversely affect our business.***

The structure of the Indian economy has undergone considerable changes in the last decade. These include increasing importance of external trade and of external capital flows. Any slowdown in the growth of the Indian economy or any future volatility in global commodity prices could adversely affect our business, financial condition and results of operations. India's economy could be adversely affected by a general rise in interest rates, fluctuations in currency exchange rates, adverse conditions affecting housing, tourism and electricity prices or various other factors. Further, conditions outside India, such as slowdowns in the economic growth of other countries, could have an impact on the growth of the Indian economy and government policy may change in response to such conditions. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and market conditions. Any financial or political turmoil or war especially in the United States, Europe or China or Asian emerging market countries, may have an impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets, and could have an adverse effect on our business, financial condition and results of operations and the price of the Equity Shares.

52. ***The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition,

India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

53. ***Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.***

Our business, results of operations and financial condition could be materially adversely affected by changes in the laws, rules, regulations or directions applicable to us, or the interpretations of such existing laws, rules and regulations, or the promulgation of new laws, rules and regulations. For further details, please see “*Key Regulations and Policies in India*” on page 135.

The governmental and regulatory bodies may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, results of operations and financial condition

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals.

The Government of India has notified four labour codes which are yet to completely come into force as on the date of this Draft Prospectus, namely, (i) The Code on Wages, 2019, (ii) The Industrial Relations Code, 2020, (iii) The Code on Social Security, 2020 and (iv) The Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations

There can be no assurance that the Government of India will not implement new regulations and policies requiring us to obtain approvals and licenses from the Government of India or other regulatory bodies or impose onerous requirements and conditions on our operations. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and financial condition.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

54. ***Financial and geo-political instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial, political turmoil and war in Europe and elsewhere in the world in recent times has affected the Indian economy. Any worldwide financial and geo-political instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability and geo-political issues in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

In addition, China is one of India’s major trading partners and there are rising concerns of a possible

slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption or geo-political concerns could have a material adverse effect on our business, financial condition and results of operation. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

55. ***We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on Stock Exchanges. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares. For example, our manufacturing facilities are located in western India, hence any significant disruption, including due to social, political or economic factors or natural calamities or civil disruptions, impacting this region may adversely affect our operations.

56. ***If inflation were to rise further in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has initiated fiscal measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

57. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India's sovereign rating is Baa3 with a "negative" outlook (Moody's), BBB- with a "stable" outlook (S&P) and BBB- with a "stable" outlook (Fitch). Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

58. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles and Indian law govern our corporate affairs. Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a corporate entity in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as one of our Shareholders than as a shareholder of a corporate entity in another jurisdiction.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

59. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares shall be determined by fixed price method. The price is based on numerous factors (For further information, please refer chapter titled "*Basis for Issue Price*" beginning on page 80 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue.

The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- i. quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- ii. changes in revenue or earnings estimates or publication of research reports by analysts;
- iii. results of operations that vary from those of our competitors;
- iv. speculation in the press or investment community;
- v. new laws and governmental regulations applicable to our industry;
- vi. future sales of the Equity Shares by our shareholders;
- vii. general market conditions; and
- viii. domestic and international economic, legal and regulatory factors unrelated to our performance.

60. *Any future issuance of Equity Shares by us or sales of Equity Shares by our Promoter could adversely affect the trading price of our Equity Shares and in the case of the issuance of Equity Shares by us result in the dilution of our then current shareholders.*

As disclosed in "*Capital Structure*" on page 62, an aggregate of 20% of the Issue shall be considered as minimum Promoters' Contribution and locked in for a period of eighteen (18) months and the balance Equity Shares held by the Promoter following the Issue will be locked-in for six (6) months from the date of Allotment. Except for the customary lock-in on our ability to issue equity or equity-linked securities discussed in "*Capital Structure*" on page 62, there is no restriction on disposal of Equity Shares by the

Promoter. As such, there can be no assurance that our Company will not issue additional Equity Shares after the lock-in period expires or that our Promoter will not sell, pledge or encumber his Equity Shares after the lock-in periods expire. Future issuances of Equity Shares or convertible securities and the sale of the underlying Equity Shares could dilute the holdings of our Shareholders and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the then trading price of our Equity Shares or the Issue Price. Sales of Equity Shares by the Promoter could also adversely affect the trading price of our Equity Shares.

61. ***You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.***

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ₹ 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealised capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

62. ***Foreign investors are subject to foreign investment restrictions under Indian laws which limit our ability to attract foreign investors, which may adversely affect the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain restrictions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of Equity Shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of the Equity Shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. We cannot assure investors that any required approval from the RBI or any other Indian government agency can be obtained on any particular terms, or at all.

63. ***There is no guarantee that our Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the EMERGE Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

Justification for “Holding Period” levels

The justifications for the holding levels mentioned in the table above are provided below:

Current Assets	
Inventories	The historical holding days of Inventories has been in range of 82 to 117 days in the last three financial years, and 88 days in the last financial year. Our Company estimates inventory holding days to be 60 days in FY 2022-23. The same seems to be reasonable in

	view of lead time for procurement of raw materials as well as nature & volume of business activity of the company.
Trade receivables	The historical holding days of trade receivables has been 254 to 118 days in the last three financial years, with an average Trade receivables days for the last three financial years is 191.33 days. As per the current credit terms of the company & prevalent trend in business of the company, the holding level for debtors anticipated at 90 days of total gross sales during FY 2022-23.
Current Liabilities	
Trade Payables	We intend to decrease the credit period expected from our creditors due to fulfilment of our working capital requirements through our proposed initial public Issue. This would help us in maintaining good relations with our creditors.

Our Company proposes to utilize upto ₹ 400 lakhs of the Net Proceeds in Fiscal 2023 towards our working capital requirements. The balance portion of our working capital requirement for the Fiscal 2023 will be arranged from borrowings and internal accruals/net worth.

2) General corporate purposes

The Net Proceeds will be first utilized towards the Objects as mentioned above. The balance is proposed to be utilized for General corporate purposes, subject to such utilization not exceeding 25% of the Gross Proceeds, in compliance with the SEBI ICDR Regulations. Our Company intends to deploy the balance Net Proceeds, if any, for general corporate purposes, subject to above mentioned limit, as may be approved by our management, including but not restricted to, the following:

- strategic initiatives, partnerships, joint ventures and acquisitions;
- brand building and strengthening of promotional & marketing activities; and
- On-going general corporate exigencies or any other purposes as approved by the Board subject to compliance with the necessary regulatory provisions.

The quantum of utilization of funds towards each of the above purposes will be determined by our Board of Directors based on the permissible amount actually available under the head “Utilization of Net proceeds” and the business requirements of our Company, from time to time. We, in accordance with the policies of our Board, will have flexibility in utilizing the Net Proceeds for general corporate purposes, as mentioned above.

1. Economic Outlook

1.1 Global Economy

As per the latest International Monetary Fund's (IMF) World Economic Outlook growth projections released in April 2022, the world economy grew by 6.1% in CY21¹. For CY22, projection for global economic growth slashed to 3.6% citing disruptions due to the Russia-Ukraine conflict and inflationary concerns. It further added that emerging economies are expected to underperform than the advanced economies in CY22 and CY23 as they were hit harder by higher energy and food prices.

Source: IMF – World Economic Outlook, April-2022

With the geopolitical tension between Russia-Ukraine, the economic consequences are anticipated to be serious in near to medium term. Surge in Energy and commodity prices have added pressure to the existing global inflation. In Asia, the biggest impact is expected to be felt among oil importers of Association of Southeast Asian Nations (ASEAN) economies, India and frontier economies including some Pacific Islands. The other impact is likely to be seen in the neighboring economies due to disrupted trade and supply chains. Further, the reduced business confidence and higher investor uncertainty will weigh

¹ CY – Calendar Year

on asset prices, tightening financial conditions and potentially spurring capital outflows from emerging markets.

Advanced economies group

Advanced economies group made growth by 5.2% in CY21 and 3.3% projected growth in CY22. In CY23, the advanced economies are projected to grow by 2.4%.

The forecast for the United States was already downgraded in January, largely reflecting non-passage of the Build Back Better fiscal policy package and continued supply chain disruptions. The additional 0.3% point forecast markdown for CY22 in the current round reflects faster withdrawal of monetary support than in the previous projection—as policy tightens to rein in inflation—and the impact of lower growth intrading partners because of disruptions resulting from the war.

The forecast for Canada is marked down 0.2% point, reflecting the withdrawal of policy support and weaker external demand from the United States.

Emerging market and developing economies group

The growth of emerging market and developing economies group is evaluated as 6.8% in CY21. While, in CY22 the estimated growth is 3.8% which is 1% lower than the previous estimation made in January, 2022. In emerging market and developing economies, increases in food and fuel prices could significantly increase the risk of social unrest.

The war and the impending increase in global interest rates will further reduce fiscal space in many countries, especially oil and food-importing emerging market and developing economies. Moreover, with continued tight policies toward the real estate sector and the possibility of more widespread lockdowns as part of the strict zero-COVID strategy, China's economy could slow more than currently projected—with consequences for Asia and beyond. It has induced a downgrade to 4.4% growth for China in CY22. This could further set back the recovery, particularly in emerging market and developing economies.

The estimates for India has been lowered to 8.2% in CY22 by 0.8% point, while for CY23 the projection has been released at 6.9%. The downgrade is reflecting in part weaker domestic demand—as higher oil prices are expected to weigh on private consumption and investment and a drag from lower net exports. Despite, these estimates project India as the fastest growing major economy in the world.

Impact of Covid-19 on Global Economy

During the Pandemic in CY20, the global economy faced disruption in supply chain due to temporary trade restrictions and shortages of pharmaceuticals, critical medical supplies, and other products. As a consequence of all this, manufacturers worldwide felt greater political and competitive pressures to increase their domestic production, grow employment in their home countries, reduce or even eliminate their dependence on sources.

Worker shortages and mobility restrictions compounded supply disruptions and bottlenecks early in CY22, constraining activity and adding to inflation. Restrictions have begun to ease as the peak of the Omicron wave passes and global weekly Covid-19 deaths decline.

With continued global effort to ensure widespread vaccination, testing, and access to therapeutics, including the newly developed anti-viral medications, world economy will be able to break the hold of the pandemic.

1.2 Indian Economy

1.2.1 GDP growth and Outlook

FY22 started with the country being hit by the second wave of the pandemic which saw lockdowns and restrictions being re-imposed across states for 2 - 3 months. This impeded economic output in Q1FY21 and led to a year-on-

year (Y-o-Y) decline of 23.8% in GDP. By the end of Q4FY21, the economy paved its way to recovery. The Indian economy bounced back strongly in Q1FY22 with 20.3% Y-o-Y growth due to low base. The easing of lockdowns and restrictions across states since June coupled with the decline in Covid-19 cases and higher vaccination rate facilitated higher economic activity at a faster than expected and this was reflected in the GDP for the Q2FY22 which grew annually by 8.5%. The dip in Q3FY22 of 5.4% can be attributed to fading base effect. India's economy recorded modest growth at 4.1% in Q4FY22, down from 5.4% in the previous quarter. The economy was hit by the third wave of Covid-19 during the quarter.

As the economy was getting back on its feet, global supply bottlenecks due to the Russia-Ukraine war and higher input costs again slowed the pace of recovery. The contraction in the manufacturing sector, which struggled with supply bottlenecks and high input prices, in the last quarter of FY22 is a cause of concern. The other worrying aspect is the reduction in consumption to GDP ratio in Q4FY22, even while the investment to GDP ratio has bounced back. The slowest quarterly growth in FY22 was also partly because of the unfavorable base effect.

Apart from this, the announcements in the Union Budget 2022-23 on boosting public infrastructure through enhanced capital expenditure are expected to augment growth and crowd in private investment through large multiplier effects.

Table 2 : RBI's GDP Growth Outlook (Y-o-Y %)

Month	Q1FY23	Q2FY23	Q3FY23	Q4FY23	FY23
June'22 Outlook (April'22 Outlook - Retained)	16.2	6.2	4.1	4.0	7.2

Source: RBI press release dated June 08, 2022; April 08, 2022 and February 28, 2022

With the ebbing of the third wave and expanding vaccination coverage, the pick-up in contact-intensive services and urban demand is expected to be sustained. The escalation of the geopolitical situation and the accompanying surge in international crude oil and other commodity prices, tightening of global financial conditions, persistence of supply-side disruptions and significantly weaker external demand pose downside risks to the outlook. Taking all these factors into consideration, the real GDP growth for 2022-23 is pared down at 7.2% by RBI in April'22 Outlook from 7.8% estimated in Feb'22 Outlook. In the recent June'22 Outlook, the RBI retained its GDP growth projection at 7.2% for FY23, with risks broadly balanced.

1.2.2 Gross Value Added (GVA)

Gross value added (GVA) is the measure of the value of goods and services produced in an economy. GVA gives a picture of supply side whereas GDP represents consumption.

The gap between GDP and GVA growth has turned positive in FY22 (after a gap of two years) as a result of robust tax collections.

- **Agriculture sector** recorded robust growth of 4.1% in Q4FY22, which was over a low base of 2.8% growth in the same period last year. The sector was hit by heatwaves in many parts of India that has impacted the production of several crops including wheat, coarse cereals and pulses. However, the total food grain production is still at an all-time high of 314.5 million tonnes, as per the third advance estimate. Anticipation of a normal monsoon, coupled with high prices for agri products and subsidy support from the government, is expected to bode well for the sector.
- **Industrial sector** grew modestly by 1.3% in Q4FY22 due to negative growth in the manufacturing segment. High commodity and input prices have been a pain point for the manufacturing sector. The construction segment benefitted from a rebound in economic activity post the third wave.
- **Services sector** recorded a growth of 5.5% in Q4FY22, primarily led by trade, hotels, transport, communication and services related to broadcasting and finance, real estate & professional service. The easing of restrictions has aided a fast rebound in this sector.

Per Capita GDP, Income and Final Consumption

India has a population of about 1.3 billion with a young demographic profile. The advantages associated with this demographic dividend are better economic growth, rapid industrialization and urbanization.

Gross Domestic Product (GDP) per capita is a measure of country's economic output per person. FY21 witnessed a significant de-growth due to the pandemic. However, in FY22 the economy is on path of recovery and the per capita GDP is estimated to grow by 7.6%. The Gross national income (GNI) is also estimated to increase by 7.4%

in FY22. The per capita private final consumption expenditure (PFCE), that represents consumer spending, is likely to increase by 6.9% in FY22. Majorly, the FY22 reflects percapita growth due to a lower base.

1.2.3 Investment Trend in infrastructure:

Gross Fixed Capital Formation (GFCF) which is a measure of the net increase in physical asset, is projected to see an improvement in FY22. As a proportion of GDP it is estimated to be at 32.5%, which is the second highest level in 7 years (since FY 15).

Chart 3: Gross Fixed Capital Formation (GFCF) as % of GDP (At constant prices):

Overall, support of public investment in infrastructure is likely to gain traction from the ethos of Atmanirbhar Bharat.

1.2.4 Industrial Growth

The IIP growth has surprised on the upside accelerating to an eight-month high of 7.1% in April 2022 supported by a broad-based improvement across sectors with strong growth recorded in the manufacturing and electricity sector. The improved performance of industrial activity is also in line with the rise in the core sector output to a six-month high in April 2022.

Chart 4 : Y-o-Y growth in IIP (in %)

Source: MOSPI (GOI)

The challenges for the industrial sector in the form of high commodity prices continues to be. However, a gradual pick-up in consumption and investment demand would be supportive of the sector, going forward.

On a cumulative basis, IIP grew by 11.4% in FY22. However, this high growth is mainly backed by a low base of FY21. The index of industrial production is higher by 2.0% when compared with the pre-pandemic level of FY20, suggesting that while economic recovery is underway, it is still very nascent.

1.2.5 Consumer Price Index

India's retail inflation softened marginally to 7.04% in May 2022 from an eight-year high of 7.79% in April, aided by a favourable base.

Chart 5: Retail Price Inflation (Y-o-Y Growth in %)

Consumer inflation has been on the upward trend since October 2021 and has reversed its trajectory in May 2022 after a gap of seven months. Despite the slight moderation, it remained sharply above the RBI's tolerance level for the fifth straight month, driven by elevated food and fuel prices.

- **Food** continues to remain the main driver with a nearly 50% contribution to total inflation. At 7.84% in May, food inflation witnessed a moderation from 8.1% last month. However, sequentially food prices gained momentum on account of rising price pressures for items like cereals, vegetables and edible oils.
 - **Cereals** inflation at 5.3% in May was primarily because of the rise in wheat and rice prices. Retail wheat prices have been trending upwards because of production shortfall due to heatwave conditions while rice prices also increased mirroring wheat price rise on solid demand.
 - **Vegetable inflation** accelerated to 18.2% in May compared with 15.3% last month. Among key vegetables, tomato prices rose sharply in May owing to less production due to heatwaves conditions prevailing in key supplier states and high fuel prices. Potato prices also hardened in May. Prices of meat and dairy were higher driven by higher feed costs. Going ahead, expectations of a normal monsoon and the recent supply-side measures taken by the government may help to ease the food price pressures to some extent.
- **Fuel and light inflation** remained elevated at 9.5% in May as a result of a hike in LPG cylinder prices (Domestic: Rs. 53.5/cylinder; Commercial: Rs 102.5/cylinder) during the month and electricity tariff revisions by many states. Coal and natural gas prices have skyrocketed in the past few months and have prompted domestic players to raise prices to maintain their margins. Rising fuel inflation has a cascading effect on inflation as it feeds into other categories due to higher transportation and logistics costs.

Core CPI

Core inflation (which excludes volatile components such as food and energy prices) eased out but was still close to 6.0% mark indicating that inflation has become broad-based.

1.2.6 Concluding Remarks

The Reserve Bank of India (RBI) at its monetary policy meeting for FY23 concluded on 04th June 2022, increased the repo rate from 4.4% to 4.9%. The Monetary Policy committee changed its stance to 'focus on withdrawal of accommodation'. These decisions are made by RBI to front-load the rate hikes to tackle the concerns about inflation getting broad-based and deeply entrenched in the system.

The major headwinds to economic growth are escalating geopolitical tensions, elevated global commodity prices and shortages of key inputs. However, the bright spots for the economy are improving demand conditions, support from government capital expenditure and improving business confidence.

The prospects for economic growth in the coming quarters are contingent on multiple factors such as progress on the Russia-Ukraine war front, the pace of monetary tightening by central banks globally and the overall global economic growth trajectory.

Consumption demand is yet to see a durable pick-up in the domestic economy. Rural demand recovery has also been bleak. High food and fuel inflation pressure is further likely to adversely impact consumption spending. But with the economy opening up, the employment situation is expected to improve providing some support to consumption expenditure.

Public investment is expected to exhibit healthy growth as the government has budgeted for a strong capital expenditure growth in FY23. The private sector's intent to invest is also showing improvement as per the data on new investment projects announced. However, the sharp rise in commodity prices and the economic uncertainties emanating from global turbulence is likely to slow down the pick-up in the private investment cycle.

Among sectors, the Industry will continue to be negatively impacted due to high input prices. Services are expected to see a bounce back in FY23 with a return to economic normalcy. However, in the services sector, some segments like Information Technology would feel the pinch of slowing in US economic growth.

2. Construction Industry in India

2.1 Overview of Construction Industry

The construction industry is a vital indicator of development for an economy as it creates investment opportunities

across various sectors. With a share of around 7.9% in, the construction industry has been estimated to make contribution of Rs. 10.73 trillion to total Gross Value Added (GVA) in FY22.

Chart 7: Trend in construction GVA at current prices

RE – Revised Estimates; PE – Provisional Estimates

Source: MOSPI (GOI)

In last decade, Indian Construction Industry has witnessed unparalleled growth. The construction industry is expected to remain upbeat due to growing demand from real estate and infrastructure projects. The GVA of construction segment had experienced slowdown since the start of FY20 due to factors such as general elections, extended monsoon. Slowdown got severe from March 2020 as a result of the restrictive measures and lockdowns imposed by the Government to contain the spread of the COVID-19 pandemic, that led to a halt of economic activities and business operations. Thus, in FY21, Construction sector GVA (at basic price) fell by a sharp 7.3%.

The growth was amplified in Q1FY22 because of a favorable base effect (low growth in Q4FY21) which aided the growth in the construction segments growing by 71.3% in Q1FY22 in contrast to a growth rate of 18.3% recorded during the previous quarter. Q2FY22 also witnessed a growth of 8.1%. Even though the sector witnessed a considerable growth in the last two quarters, the GVA levels were still low compared to the pre-pandemic levels. The second half of FY22 the construction segment benefitted from rebound of economic activity.

The order book of construction companies is dependent upon the capital expenditure in the economy. Broadly, the investments can be classified into infrastructure, real estate and industrial construction. Historically, infrastructure creation, spread across sectors such as roads and highways, telecom, airports, ports, power, oil and gas and railways has dominated the investments. Increase in Infrastructure demand & government initiative shows the potential for catapulting India to the third largest construction market globally. The sector is expected to contribute more than 10% to the Indian economy by 2030.

Chart 8: Share of key segments that contribute to construction spending

One of the major drivers of the infrastructure sector in India is the infrastructure related investment by the government of India. The government of India has pushed massive investment in the infrastructure sector through various means since it is a core sector for driving the economy.

The construction industry in India is expected to soar high with increased demand from real estate and infrastructure projects. Also, the booming industrial development augurs well for growth of construction sector.

2.2 Trend of Capital Expenditure

In the past few years, government spending has increased significantly towards capital expenditure as such spending helps to push growth and employment. This also has a multiplier effect on the economy, thereby increasing consumption and demand in the economy. In the Union Budget 2022-23, the government continued to provide thrust to infrastructure development. Major allocation has been made towards Defence followed by Consumer Affairs, Food and Public Distribution and Road Transport and Highways.

Chart 9: Trend of Capital Expenditure in the Union Budget (Rs. in Billion)

A – Actuals; RE – Revised Estimates; BE – Budgeted Estimates

Source: Union Budget 2022-23; PRS

Budget Estimates of Capital Expenditure for 2022-23 show an increase of Rs. 1,475 billion (24.5% increase) over Revised Estimates 2021-22. The increase in capital expenditure is due to substantial increase in loans and advances to state governments followed by higher investments in National Highway Authority of India, capital expenditure of Bharat net and capital infusion in BSNL and higher requirements for railway capital works are some of the reasons.

In the budget 2022-23, PM Gati Shakti was launched by the Prime Minister, it is a National Master Plan for Multi-modal Connectivity which is essentially a digital platform to bring 16 Ministries including Railways and Roadways together for integrated planning and coordinated implementation of infrastructure connectivity projects.

In the Infrastructure Sector, projects under the **National Infrastructure Pipeline scheme** which was launched year and is linked to transportation and logistics infrastructure, will be integrated with the PM Gati Shakti framework. The North-Eastern Council will implement the Prime Minister's Development Initiative for the North-East (PM-DevINE) to fund development initiatives in the region.

Table 5: Capital expenditure in budget 2022-23 for infrastructure sector (Rs. in Billion)

Ministry	FY21 (Actual) (Rs. in Billion)	FY22 (RE) (Rs. in Billion)	FY23 (BE) (Rs. in Billion)
Road Transport and Highways	892	1,212	1,877
Railways	1,093	1,171	1,371
Housing and Urban Affairs	103	259	273

For Roadways, in 2022-23, the PM Gati Shakti Master Plan for Expressways will be developed. In 2022-23, the National Highways network will be extended by 25,000 kilometres. There has been an increase in investment in National Highway Authority of India from Rs. 650 billion in 2020-21 to Rs. 1,340 billion in 2022-23. This has led to an increase in allocation to the Ministry of Road Transport and Highway (MoRTH) by Rs. 679 billion in 2022-23 over the revised estimates of 2021-22. Budgetary allocation of Rs. 2,000 billion to MoRTH, increase by 69% to MoRTH on y-o-y basis.

- **For Railways**, to assist local firms and supply chains, the one-station-one-product idea will be applied. During the following three years, 400 new Vande Bharat trains will be built and manufactured. Further, 100 cargo terminals for multimodal logistics facilities will also be developed during the next three years.
- **For Housing**, 80 lakh houses to be completed in FY23 under **PM Awas Yojana scheme** with an allocation of Rs. 480 billion. In addition, states will receive one lakh crore rupees in the form of 50- year interest-free loans to help catalyse investment.

FDI in Construction Development Sector

The Department for Promotion of Industry and Internal Trade (DPIIT) includes townships, housing, built-up infrastructure and construction-development projects like housing, commercial premises, hotels, resorts, hospitals, educational institutions, recreation facilities, city and regional level infrastructure under construction development sector. According to DPIIT, Foreign Direct Investment (FDI) in the construction development sector stood at USD 27,969 million between April'00 and March'22. In FY22, infrastructure development accounted for 5% share of the total FDI inflows of USD 58,773 million.

3. Overview of construction chemicals

3.1 Introduction

Construction chemicals, as the name suggests, are chemicals formulation used to hold construction materials at the time of construction. These formulations are used with construction materials like cement, concrete and other construction materials. The construction could be residential, non-residential or non-building. These chemical compounds are sub-category of speciality chemicals.

The main purpose of construction chemicals is to improve quality of building materials and add more sustainability and strength to the structures. The cost of construction chemicals imparts minimal percentage of total project costs, but the benefits realised are for more. Some of these chemicals help in minimizing the quantities of cement and water used in the construction and can be used for cross-linking or liquid to solid phase change application.

With gradual increase in contribution by construction industry in global GDP, the construction industry is expected to represent a bigger part of the global economy in the medium-long term. Surging population and urbanization are the key driver for the need of sustainable infrastructure and environment friendly products which makes infrastructure the most attractive market for construction chemicals globally. The market size of global construction chemical sector is expected to reach near to the USD 70 billion by FY26 with CAGR of approximately 7%.

The construction chemical market in Asia-Pacific region has been fastest growing in the global market. This region is estimated to generate revenue of ~USD 11 billion by FY26. With increase in average age of the population and urbanization, significant growth can be foreseen for the construction chemical sector, especially in the Asian countries such as India and China.

Over the few years, investment in commercial and residential housing and renovation activities of historical monuments, water retention structure, bridges, and other civil structures have led to significant consumption of construction chemicals across India. The Indian market is still small when compared with global market, but the growth prospects are very bright. With increase in construction spending, the Indian construction chemical market is estimated to grow at the CAGR of ~13% by FY29.

3.2 Key segments of construction chemicals

The Indian Construction chemicals market majorly consists of admixtures, flooring chemicals, waterproofing compounds, adhesives & sealants and repair and rehabilitation. The adhesives, sealants and admixtures segment own the majority of the share in this market, preceded by repair and rehabilitation segment.

Based on the end use applications, the construction chemicals compounds can be broadly classified into the following five categories:

Figure 1: Key segments of construction chemicals

3.2.1 Concrete Admixture

Cement which is a widely used non-metallic material in construction, is mixed with crushed rock, sand and water in specific proportion to produce concrete. For better workability and more strength, admixtures are added to the mix immediately before or during mixing. Admixtures are chemicals or additives added during concrete mixing to enhance the properties of the concrete. The benefits of concrete admixtures are:

- Reduce the cost of concrete construction
- To modify the concrete properties
- Offer high comprehensive strength, durability, water tight and better finish
- Ensure quality of concrete during mixing, transporting, placing, and curing in adverse weathercondition
- To slow the corrosion of reinforcing steel in the concrete

The concrete admixture segment is projected to occupy major share in the construction chemical industrywith revenue generation of ~USD 12 million by FY26 at CAGR of ~4%.

Export trend

In FY22, total exports of prepared admixture are valued at Rs. 307 crores. The largest share of prepared admixture export in FY22 has been Bangladesh with ~31%. With opening up of cross country trade afterthe pandemic, the admixtures have witnessed significant growth in terms of exports. Over the years, theconstruction chemical industry has been modernizing through new molecules, innovations in technology,product profile which is likely to gain traction in the global market.

Chart 10: Export of Prepared admixture for Cements-Mortars (Rs. in crore)

Source: Department of Commerce (GOI)

Usually, Admixtures are selected based on the site condition and desired strength characteristics. The Various types of concrete admixtures are as follow:

a) Air-Entraining Admixtures

As the name suggests, air-entraining admixtures entrains the air bubble inside the concrete and gives high resistance to freezing and thawing action. The air-entraining admixture uniformly distribute airbubbles. During the event when the surrounding temperature drops below 0C, the entrain bubble in the concrete act as expansion chambers against the increase in volume experienced by the transformation of water into ice. Thus, the frost-resistance characteristic makes air-entraining admixtures suitable for use in cold climates.

b) Superplasticizer

Superplasticizer are additives used for water reduction for high strength concrete. Plasticizer are chemical compounds that enable the production of concrete with ~15% less water content. The superplasticizer allow ~30% or more reduction in water content. This improves workability and performance of the concrete structure.

c) Corrosion Inhibitors

Corrosion Inhibitors are used to prevent the risk of corrosion in steel bars used in the structure. These inhibitors either extend time to corrosion initiation or reduce the extent of corrosion. Corrosioninhibitors slow down corrosion by increasing anodic or cathodic polarization. Thus, this admixture can be used in extending life of concrete structures such as highways, multi-storey car parks, jetties, wharves, mooring dolphins, and sea walls.

d) Accelerators

Accelerators are added to a concrete batch either immediately before mixing or during mixing. This admixture causes an increase in rate of hydration which means it helps in make concrete set faster. At the same time, it also increases early strength of concrete.

e) Retarders

Retarders are admixtures which delay the setting of cement paste. When retarders are used in the concrete, it temporarily slows down hydration process. Due to this, the concrete remains in plastic stage and remains workable for a longer time.

Compressive Strength of Concrete

Compression strength of concrete is a measure of the concrete's ability to resist loads without any crack or deflection with passing days. Inclusion of the admixture in concrete adds to the compressive strength of concrete notably. Concrete with admixture showcase remarkable resistance ability. Thus, application of concrete admixture is important for enhancing the durability and strengths of the concrete mix.

3.2.2 Waterproofing Chemicals

Out of some of the natural factors like air, water, climate, wind and humidity that govern deterioration of structure, water is a prime cause of such degrading. For which, waterproofing chemicals are used to stop water infiltration. These compounds or membranes can be extremely effective when applied at the exterior or at the foundation. Water proofing compounds are available in liquid, solid, slurry and two- component coating forms. These products could be urethane based, modified asphalts, clay based or rubber polymers.

These chemicals cater to various end use of application products such as polymer modified cementitious composites, elastomeric polyurethane, water proofing concrete, polysulphide sealants, polyurethane systems, water repellents, and butyl & acrylic sealants, depending on the need or damage to the structure.

Below are some of the benefits of using waterproofing chemicals:

- Helps in improving durability of different type of surfaces by preventing unwanted moisture
- Prevention of damaged caused due to seepage which may ruin the structural strength

- Prevents rusting of metals and decay of wood

Waterproofing chemicals products

a) Polyurethane based

Polyurethane based waterproofing materials can be used for different functions such as membrane, coating, mastic and sealant. These materials are durable, long-lasting and they provide high performance. Polyurethane is a rather popular choice due to its ease of installation. This is one of the most expensive chemical waterproofing methods available in the industry.

b) Bitumen based

Bitumen which is typically known as asphalt, is used as foundation for bituminous paints which are coating products. These are highly effective as sealants, corrosion prevention and hold strong adhesive properties. Thus, these products make best waterproofing material choice due to its versatility.

c) Polymer based

Usually, polymer based chemical products includes Styrene butadiene rubber (SBR) and acrylic polymers. These are waterproofing agents for application requiring in Flat Roof concrete, Kitchen Balconies, Chajjas, Slope roofs and wet areas like Bath-rooms, Canal linings, Swimming pools, Water tanks etc.

3.2.3 Flooring Compound

Flooring adds warmth and charm to the structure and considered vital component for structures aesthetic. There are chemicals added in floor concrete in order to render it denser and more durable.

The flooring compounds are used to meet various industrial needs such as abrasion, load impact, chemical attack, moisture penetration, strengthening of damaged floors, as well as improving the aesthetic appeal of the floor. They are also used to provide certain special features such as slip resistance, static resistance, fire resistance, antibacterial properties, and so on. These are also used in levelling and creating even floor surface.

Flooring compounds are largely included in application at the finishing stage of the construction. Major commercial complexes and shopping malls prefer these flooring compounds. Flooring compounds are mostly epoxy and polyurethane based.

Epoxy flooring

Epoxy floor systems are mostly used in heavy-duty industries such as general as well as machinery manufacturing, warehouses and logistics etc.

These industries often involve heavy vehicle movements like the use of forklifts and thus, epoxy floor coatings are considered as they are harder. These provide higher durability and compressive strength.

Polyurethane flooring

Polyurethane flooring are considered to be more flexible. These are more scratch-resistant compared to epoxy. With respect to chemical exposure, these are preferred options for food industries which have exposure to lactic and other fruit acids.

3.2.4. Repair and Rehabilitation Products

Repair and Rehabilitation is highly unexplored and under developed market. The main rehabilitation methods are concrete jacketing, Steel Jacketing and Fiber Reinforced Polymer (FRP) wrapping.

Jacketing is the process whereby a section of an existing structure is restored to original dimensions or increased in size by encasement using suitable materials. Wherein, weak reinforced concrete columns deteriorated over some time due to adverse atmospheric conditions or due to poor maintenance of the structure are strengthened.

FRPs are simply defined as high-strength and lightweight reinforcements created by combining carbon or E-glass fibres with a polymer material. These are used to create an externally bonded reinforcing system that is ideal for application to existing structural elements.

To carry on repair and rehabilitation methods, the products involved are:

a) Cementitious repair mortars

Cementitious mortar is a cement-based binding material used to stick building blocks such as bricks, stones and other similar building materials together. These are also used with additives that contribute to important qualities for efficient concrete repair, including anti-corrosion.

b) Epoxy-based resin mortars

Epoxy-based resin mortars are popular for use in repairing concrete as they can be layered up to fill cracks and gaps with more than 50mm depth. Epoxy concrete repair mortars are used to provide new strength to damaged concrete. Most of the times, these offer a permanent repair that is tough enough to stand up to overall heavy use.

Some other types of repair and rehabilitation products are moisture insensitive epoxies, structural additives, synthetic adhesives, rust removers, corrosion inhibitors and so on.

3.2.5 Miscellaneous

The residual category of construction chemicals includes – Sealants, Protective coatings and resins, Grouts and Tile Adhesives.

- The **sealants** are used to seal expansion joints, holes, concrete road joints, and to fill concrete gaps. In constructions, the sealants are used to prevent fluid and other substances from passing through the joints and gaps. The different types of sealants are Polysulphide sealants (used as expansion joints for concrete roads, structural joints etc), Polyurethane sealants (for high flexibility and bonding strength), Silicone sealants (for bonding between two dissimilar surfaces) and Acrylic sealants (for day-to-day applications of gap/crack filling)
- **Protective coatings** are mainly applied for corrosion protection. It also includes waterproofing and epoxy resins. It emphasizes more on protective properties than the esthetic properties. Epoxy resins are known for their adhesive as well as corrosion protective properties.
- Grouting is the process of injecting material into cracks or gaps in concrete structure to increase its load bearing capacity and the materials used in this process are called **grout**. Grouts are used to give extra strength for the load bearing structures.

4. End user Industry – Construction Chemicals

The construction chemicals industry is growing at a significant rate, majorly due to increasing government investments in infrastructural projects, rising construction spending, increasing government initiatives towards urbanization and housing for all and improving focus on repair and rehabilitation. However, the construction chemicals still have low consumer recognition and with proper understanding and user benefits, the construction chemicals are expected to contribute significantly towards growth and building of Indian Economy. Some of the key end user industries of construction chemicals are:

- Construction and infrastructure (including roads, railways and real-estate)
- Repair and rehabilitation
- Retail Segment

4.1 Construction and Infrastructure

Infrastructure is the back bone for any economy. The extent and quality of infrastructure determines the ability of the country to utilize its comparative advantage and enables cost competitiveness. Given the strong backward and forward linkages and the positive externalities that infrastructure generates, it can be a vehicle for social and economic transformation.

The growth drivers of the Indian Infrastructure sectors that maintain the demand for construction chemicals are - growing better infrastructure needs, government initiatives, international investments and public private partnership projects. With increasing market size of construction sector, growth of its related sectors like construction chemicals is likely to follow the similar trends.

The Construction sector was hit hard during the pandemic, because of the lockdown, labor migration leading to logistical challenges. There were supply side issues such as problems in raw material procurement, increase in the prices and manpower mobilization, but these were addressed. The sector has witnessed a growth in FY22, supported by unlock measures and significant infrastructure investments made by the Government of India (GoI) resulting in recovery of order book execution. Meanwhile, the sector is facing the challenge of record increase in the prices of construction materials such as cement and steel which could affect the profitability of industry players going forward as prices of inputs are likely to continue to remain at elevated levels in the near to medium term.

Going forward, the outlook for construction sector is favorable supported by continued government spending on infrastructure.

4.1.1 Roads Transport

India has the second largest road network in the world after USA, spanning a total of 62.18 lakh kilometers (kms). This road network transports 64.5% of all goods in the country and 90% of India's total passenger traffic uses road network to commute. The Indian road network comprising of National Highways, Expressways, State Highways, Major District Roads, Other District Roads and Village Roads. While development of National Highways has been the key area of focus, the largest proportion of roads continues to be state highways, district and rural roads.

Table 6: Breakup of Road Network

	lakh kms	%
National Highways	1.41	2%
State Highways	1.71	3%
Other Roads	60.59	95%
Total	63.71	100%

Road transportation has gradually increased over the years with improvement in connectivity between cities, towns and villages in the country. The development and maintenance of roads in India are undertaken by various agencies of both Central and State Governments. The Ministry of Road Transport & Highways is primarily responsible for the development and maintenance of National highways and executes the same through the agency of National Highways Authority of India Ltd, National Highway Infrastructure Development Corporation Ltd (NHIDCL), and State PWDs & Border Roads Organizations etc.

India's road infrastructure has seen consistent improvement in the last few years. Connectivity has improved and road transportation has become a focus of rapid development. Roads are providing better access to services, ease of transportation and freedom of movement to people. Recognizing the significance of a reliable and swift road network in the country and the role it plays in influencing its economic development, the Ministry of Road Transport and Highways (MORTH) has taken up the responsibility of building quality roads and highways across the country.

Road construction trends in recent years also give optimism of achieving high targets during next few years in spite the sector badly hit by the Covid-19 pandemic and partial lockdown at various states across India. In the FY22 10,457 kms of road network were constructed as compared to 13,327 km in the FY21. The FY21 had witnessed a 30.4% increase in road construction with record high 36.5kms per day construction in the month of March 2021. This is due to a significant increase of 29.5 % of public expenditure compared to previous year. The FY22 exhibited slowdown by 21.5% due to factors such as extended monsoon, pandemic related disruptions and localized

restrictions.

The previous highs of project awards until FY18 waned due to reduced private sector participation. However, with increased focus towards EPC and Hybrid Annuity Models (HAM), the pace of awards of National Highway projects grew at a strong pace of ~32% CAGR over the past 4 years (Refer chart below). Along with strong targets for the FY22 ha continued to be seen from the chart below:

Chart 12: NHAI – Projects Awarded and Completed (in kms)

Source: MoRTH submissions and CareEdge Research

Further, as part of the PM Gati Shakti National Master Plan, the MoRTH plans to develop 22 Greenfield Expressways, 23 other key infrastructure projects & other highway projects and 35 Multi-Modal Logistics Parks (MMLPs), as part of the Bharatmala Pariyojana and other schemes of the Ministry.

National Highways under the Bharatmala Pariyojana Scheme

Under Bharatmala Pariyojana Phase-I, projects comprising length of 19,265 km have been awarded with cost of Rs. 5.6 trillion. Currently, a total length of about 6,750 km has been completed. The government aims to construct 12,000 km of National Highway during the current fiscal year out of which 5,118 km has been constructed as on 30th

November 2021.

Year	Target (Km)	Achievement (Cumulative)			
		1 st Quarter	2 nd Quarter	3 rd Quarter	4 th Quarter
FY22	12,000	2,284	3,824	5,518 (till, Nov 2021)	NA
FY21	11,000	1,823	3,950	7,767	13,327

Source: MoRTH

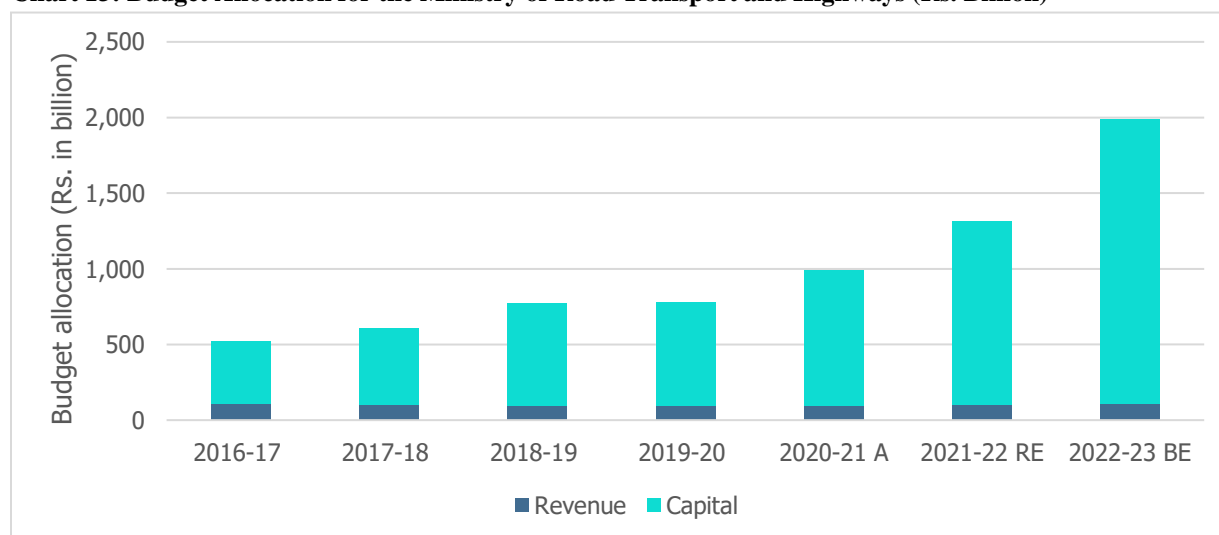

For Phase 2, the planning has already been started. The NHAI has identified that 5,000 kilometers will be covered under phase 2 of the Bharatmala.

With added stress on multimodal integration, road safety, increasing use of Information Technology applications, augmentation of existing funding sources and emphasis on green initiatives, the Ministry is taking steps to further intensify the efforts to realize the vision of the Prime Minister of providing seamless connectivity across India so that it becomes USD 5 trillion economy by FY25.

Infrastructure Development to support growth in the medium term to long term

With all time high budget allocation in FY23 towards capital expenditure, ~Rs. 2 Lakh crores has been allocated for development of road network in the Union Budget 2022-23. The outlay on road infrastructure is 58% more than in FY22.

Chart 13: Budget Allocation for the Ministry of Road Transport and Highways (Rs. Billion)

The budget plan aims for multi-modal logistics facilities and connectivity systems under the PM Gati Shakti. For infra push, financial assistance of Rs. 1 Lakh Crore has been allocated to states from centre. Through this, the Government is planning to generate employment opportunities and augur well for the Roads sector.

With increasing government support for development of road sector and modernized approach, the growth of construction chemical industry is aligned with progress of road sector.

4.1.2 Real Estate

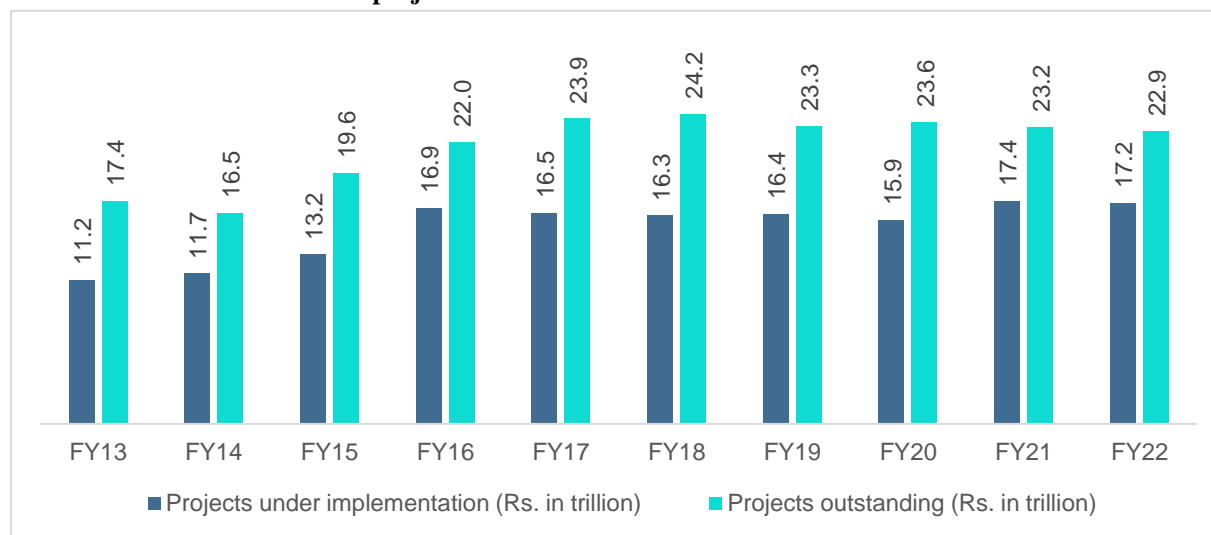

The real estate industry is one of the most crucial and recognized sectors across the globe. In India, it is one of the major sectors in terms of its direct, indirect and induced effects on the economy. Broadly, the real estate industry can be classified into residential and commercial real estate. The commercial real estate segment can be further

segmented into office, retail and hospitality.

The residential real estate accounts for nearly 80 per cent of the total real estate market in India as it is more end-user driven. The commercial segment depends on employment opportunities in the country, particularly for the office space. Along with this, discretionary spends determine the growth of the hospitality and retail segments. With increased population and urbanization, there is consistent demand for residential and commercial buildings. Construction chemicals are widely used in residential infrastructure and commercial infrastructure, owing to the rise in demand for housing, domiciliary and office buildings in urban areas.

Around three houses are built per 1,000 people per year as against the required construction rate of five houses per 1,000 individuals per year, as per industry estimates. This indicates that there is significant untapped potential for growth in the sector. While the current shortage in housing in urban areas is pegged at around 10 million units, the shortage in the affordable housing space is expected to be much higher considering the population belonging to that strata. Along with this, increased economic growth and the uptick in India's service sector has created additional demand for office space, which in turn is likely to result in greater demand for housing units in nearby vicinity.

Chart 14: Trends in Real estate projects

Source: CMIE

The significant increase in new real estate projects in past 10 years exhibits growth in the demand for real estate in India. With about Rs. 22.9 trillion of projects outstanding as on FY22 and 227 new projects launches during the FY21, the dire need to complete the construction can be foreseen in the coming years. The new project launches may be subdued in FY22 as realty developers will focus on clearing existing housing inventory and completing pending projects. Hence, the improvement and gradual movement towards completion of real estate projects bodes well for construction chemical industry. Factors such as increased government budget on housing schemes and development of townships also augurs for the growth of construction chemical industry. Adding to this 100% FDI in real sector would also significantly drive the growth of construction chemicals.

India is in the top 10 price appreciating housing markets internationally. Therefore, it is also expected that this sector will incur more non-resident Indian (NRI) investment, both in the short term and the long term. The growing flow of funds through the FDI route in Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards.

Foreign investments continue to pour in this sector and returning to offices have also boosted the leasing business. The office and retail sectors are stabilizing and showing improvements after being heavily disrupted by the pandemic.

The commercial real estate segment was one of the worst hit segments by the pandemic. Demand took a severe hit due to retrenchment of workers, work-from-home system which made companies rethink their need for leasing or buying commercial real estate. The demand for commercial real estate dipped in the first half of CY20 on account

of the coronavirus pandemic. However, a resumption to normalcy and improved vaccinations enabled unit sales to increase gradually from H2CY20 to H2CY21.

The commercial real estate segment, which includes industrial, retail and warehousing is projected to do well on account of a rapid growth of the warehousing segment and a gradual pick up in the office segment.

In Q4FY22, the pace of growth in the commercial leasing space is recovering despite the emergence of the omicron wave. The volumes of the leasing activities have improved by 11% to 14% in this quarter and are expected to continue to grow given the “Back to office” trend and hybrid working model. Also, with the growing start-ups the need for co-working space is increasing. The co-working space has also contributed to a favorable 20% to 22% in the total transaction space growth. Apart from this, the hybrid model of working is creating the demand closer to home. Big conglomerates and multinational corporations have closed some large-ticket lease deal in the recent past after the Covid-19.

The retail and warehousing segment witnessed boost due to the increase in preference for e-commerce and an online presence of most retailers. This is going to lead towards greater demand for warehousing due to a need to store agricultural produce and e-commerce products near major consumption centers.

The residential real estate segment made a quick turnaround post the first wave of the pandemic and remained buoyant in the second wave which was more severe in terms of intensity. The residential real estate segment remains poised for growth in the future on account of relatively better economic momentum, mass vaccination drives and better preparedness to deal with newer variants of the virus or any lockdowns. The resumption in sales and launches indicates that consumer sentiment surrounding investing in a property is picking up. The perception of owning a house is more lucrative now due to an amalgamation of factors such as low home mortgage rates, competitive prices and flexible payment schemes rolled out by developers.

The residential sector is expected to grow significantly with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Along with this, the growing flow of FDI in Indian real estate is encouraging increased transparency. In order to attract more funding, developers have revamped their accounting and management systems and are meeting due diligence standards. This will help increase confidence of prospective buyers too.

Additionally, with increased penetration of property technology, virtual reality, interior design and property management through prop-tech are likely to be key growth drivers of residential space.

Conclusively, under infrastructure segment, the increased urbanization schemes such as the Revolutionary Smart City Mission are expected to improve the lifestyle through modernized and technology driven urban planning. The increasing demand for urbanization bodes well for the development of construction chemical industry.

4.1.3 Railways

Investments in the railways have remained subdued in comparison with the power and road sectors, though it picked up pace since 2016. The key focus areas have been decongestion of over utilized rail network, construction of new lines, doubling, tripling, quadrupling of rail lines and purchase of rolling stock such as wagons, locomotives, coaches, etc.

The Union Budget 2022-23 has focused on ‘One Station-One Product’ to help local businesses and supply chain. Plans of development of 400 new Vande Bharat trains in the next 3 years along with development of 100 Cargo Terminals over next few years. 2,000 kms of network to be bought under Kavach for safety and capacity augmentation in 2022-23.

Under NIP, total capital expenditure of Rs. 13.68 trillion by both Centre and States would be made between FY20 to FY25. About 724 identified projects will be implemented in the period 2020-25. Out of the 724 projects, 697 projects worth Rs. 11.97 trillion will be implemented through EPC mode, while 27 projects worth Rs. 1.61 trillion will be implemented through PPP mode.

Capital expenditure has been increased substantially for Indian Railways from an average Capital expenditure

during 2009-14 of Rs. 460 billion to 2,458 billion during 2022-23 (BE).

Since, construction of new lines and decongestion of over utilized railway tracks are key focus areas of the government, demand for construction chemicals indicate signs of growth.

4.1.4 Other Industrial Sectors

The manufacturing companies as well aim at expanding their manufacturing capacity at different parts of the country to cater their expanded product line. For which, the companies demand construction which are durable, efficient and require less maintenance. With growing industrialization and gradual shift towards domestic manufacturing, the growth of construction chemical market is supported by these factors as well. Thus, the industrial infrastructural development also assists in raising the demand for construction chemicals.

4.2 Repair and rehabilitation

- There is a growing global concern about the premature deterioration of building or structures. Though concrete is quite mechanically strong, it is highly susceptible to deterioration and thus gets damaged & sometimes collapses ultimately, unless some measures are adopted to counter deterioration. Measures like repairs, maintenance and rehabilitation aim to enhance the durability of the structure. With growing awareness about new technologies and new repair material, the repair and rehabilitation segment is considered to be fastest segment of the construction chemicals industry.
- For repair of any concrete structures, construction chemicals are very much commonly used in advanced countries for obtaining long term results. India is yet to completely adapt to usage and application of construction chemicals. The adaption of new technologies and materials is required on large scale to attain durable structures on long term basis. Often, the normal periodical maintenance is being ignored and very much lacking. This originates increase in the requirement of repairs and rehabilitation.
- The Repair and Rehabilitation market includes a number of chemical compounds which are used in each stage of construction activity, i.e. right from foundation to finishing and also repairs. The rehabilitation and repair segment of construction chemicals make up a significant volume of total share of construction chemicals. These construction chemicals help to safeguard the infrastructures against extreme environmental calamities. As eco-friendly construction has become one of the emerging needs in the 21st century, the demand for new eco-friendly repair and rehabilitation chemicals has been hitting new positive fronts. Thus, any advancement in the construction techniques or processes is bound to exhibit direct effect on the market fundamentals of construction chemical.

- With growing travel and tourism in India, the government is showing gradual interest in restoration of monuments in India. The demand for construction chemical is related to the restoration projects as well.

Not only for tourism, the repair and rehabilitation can be undertaken for variety of projects – like small residential society, high rise Residential Buildings, Commercial Buildings, Cement Chemical Plants, Bridges, Power Plants, Jetties, Five Star Hotels etc. Each structure would require different types of work based on the structural needs. For instance, rehabilitation work is required for civil construction work & old building structure, Structural Strengthening work is required for heavy industries, Waterproofing is needed for old & New Buildings and Repairs contractor's work is required for waterproofing, roofing, flooring, plumbing & painting.

- Construction Repair and Rehabilitation chemicals are divided into concrete floor repairing chemicals, rust removers, corrosion inhibitors, repair mortars, moisture insensitive epoxies etc. Some of the types of services relating to repair and rehabilitation are:
 - Micro concrete and repairs mortar
 - Carbon fiber strengthening and wrapping
 - Retrofitting service
 - Heritage building repairs and restoration
 - Railway bridges repairs
 - Roads repair
 - Structural strengthening
 - Dam repair and rehabilitation
 - Grouting service
 - Column Jacketing
 - Gunitings & Shotcreting
- Repair and rehabilitation sector have considered to be largely unorganized. Issues relating to climate change and poor quality of concrete mixed are some of the factors for deterioration of infrastructure. The increase in seismic activities or any other natural calamities also result in major structural damages. These factors lead to early distress sign in a structure and hence lead to more demand for the repair industry. The growth in repair sector is continuous which require more awareness due to increase in distress scenarios like cracks, delamination or even sudden collapses. Such events may lead to alarming possibilities as this is associated with risk of loss of life. Rehabilitation embroils contribution of high end technology and advanced skills. To cater to these challenges, construction chemicals play significant role in providing sustainability and longevity to the structure.

4.3 Retail segment

With the economy recovering from the pandemic, the retail industry has resumed sprouting. The retail segment is driven by consumption and the growth in consumption of construction chemicals by households is likely to witness growth due to some of the factors such as increasing urbanization, increase in disposable income, favourable demographics, change in lifestyle, brand consciousness and growth of e-commerce. In recent years, with growing awareness about the benefits, construction chemicals are often being used in day-to-day household activity. Majorly, the construction chemical used by households are adhesives, sealants and waterproofing solutions.

For the short term fixes like fixing the tap leakage, filling up the minor cracks on walls or tiles, filling the gaps in antiques or for fixable broken objects, demand for construction chemical continues to remain.

Thus, the key drivers in retail segment for construction chemicals are:

- **Growing awareness for the use and application of construction chemicals through effective marketing and training**

To make user aware of their application and benefits, effective marketing of product is important. Spreading awareness through advertisement and campaigns about usage of the chemical for correct application and better results will reinforce the customer's belief in the utility of construction chemical. Adding to this, to be able to deliver the product at the consumer's doorstep is can be another success factor.

- **Increase in Disposable income**

The demographic structure of the country has witnessed change in the past few years. Along with this, there has been increase in disposable income and growth aspiration for better living and amenities. The shift in aspiration for better standard of living is another key driver for renovation and property upgrade. Hence, this factor is also likely to cater growth for construction chemicals.

- **New product innovations and technologies**

Focus on development and marketing of innovative product which are expected to outgrow traditional products is one of the another important key factor. Necessary innovation for quick fixes which ultimately targets the retail consumer segment can also lead to growth in construction chemical market.

- **Low product costs**

With problems like the low awareness and price sensitive nature of the market, it is bit challenging to get consumers to accept more expensive products. Thus product innovation must also focus on creating affordable products with wide applications. Cheaper adhesives and waterproofing solutions can also be a good strategy to gain traction in terms of sales.

5. Challenges faced by the industry

The construction chemicals market in India can be considered to be under-developed when compared globally. Even though the opportunities for the construction chemical markets outweigh the challenges, the biggest challenge for this industry in recent years have been product pricing and low awareness. On the basis of values, Construction chemicals have limited demand, which are mostly used in premium construction projects. Some of the segments in the construction industry are still not wholly aware about the benefits of various construction chemicals, and consequently, tend to use substitutes at low costs. Following are few key challenges faced by the industry:

- **Price sensitivity**

In Indian construction chemical market, the demand of customers is to receive best quality at very low price. However, this market is still very cost-conscious. Due to limited awareness, customer prefer usage of low-cost substitutes. This further adds the requirement for research and development to maintain balance between quality and price.

- **High competition**

Due to low entry barriers, the market comprises of large MNCs as well as small manufacturers both. Which is a core reason for high competition in the construction chemical market as the manufacturer tend to sell low value products by sacrificing on quality element of the product.

- **Lack of awareness**

Due to lack of awareness about the usage and application of construction chemicals, the benefits of construction chemicals is not well recognized to the user group. Since, the construction chemicals need to be used in an appropriate way and at the right time, the value addition made to construction works are not fruitfully realized if the technicalities are incorrectly followed. Hence, there is need for technical guidance which is fairly lacking.

- **Lack of skills among laborers**

By nature, Construction chemicals are sensitive in nature and require some basic technical expertise and training. Due to limited access of this expertise and training, the workers employed in construction lack the skills to effectively use the construction chemicals.

- **Absence of quality standards**

The absence of quality standard and stringent regulation creates multiple challenges in terms of price and quality for manufacturers. This effectively distorts the market and may create price wars. Further, introduction of sub-standard products manufactured for maximizing profit has ruined the industry growth. Consumers using sub-standard products don't get the results by the applications, which in turn develop adverse insight for the customers as well as end users.

6. Government Initiatives

The government of India's commitment to increase spending on infrastructure development bode well for the expansion of the construction chemicals market in the country. Some of these government initiatives are:

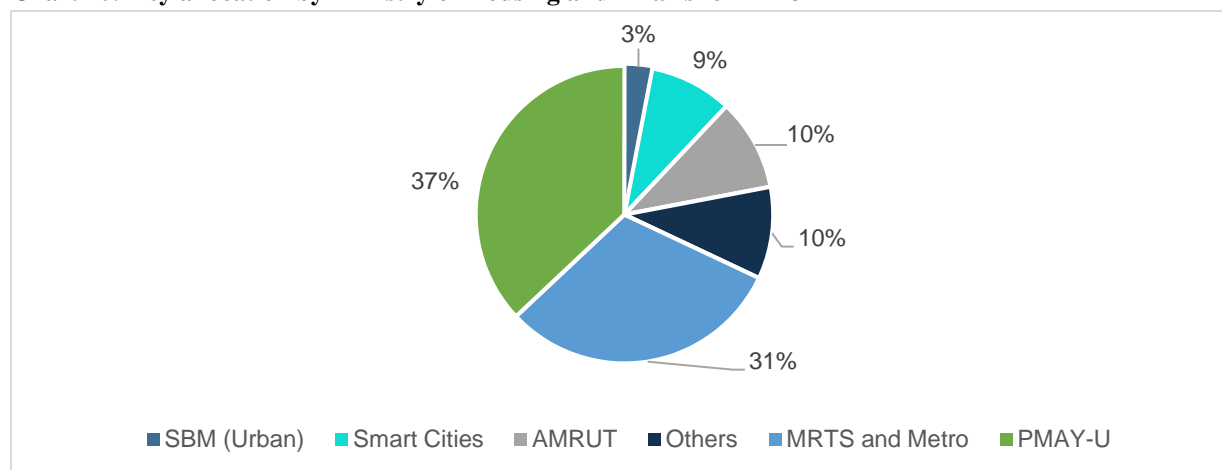

- **'Make in India'** initiative supports facilitation of investments, fostering innovation, enhance skill development and built best in class manufacturing infrastructure in the country. Which eventually promotes infrastructural development. This initiative mainly focuses on 25 sectors. Chemicals and construction being one of these sectors, the growth momentum is likely to witness significant growth and optimism which can potentially be a growth driver for construction chemical industry.
- **'Pradhan Mantri Awas Yojna' (PMAY)** which support industrial as well as infrastructural development create long term growth opportunities for construction chemical market. Under PMAY, the target of 'Housing for all' by the year 2024 is set at 2.95 crore houses. The total number of sanctioned houses under PMAY(U) is 114.04 Lakh; of which around 93.25 Lakh have been grounded for construction and around 54.78 Lakh have been completed and delivered to the beneficiaries as on 15th February 2022. This initiative is leading to significant opportunities for construction sector as well as for its sub-sectors like construction chemical industry.
- The **'Smart City Mission' (SCM)** initiative focuses mainly to drive economic growth and improve the quality of life of people by enabling local area development and harnessing technology, especially technology that leads to Smart outcomes. Of the total proposed projects under SCM, 7,905 projects worth Rs 193 billion (94% by value) have been tendered so far, work orders have been issued for 7,692 projects worth around INR 180.5 billion (88% by value). 3,830 projects worth Rs. 609 billion (33% by value) have also been fully completed and are operational as on 10th April 2022. Such scheme bodes growth in urbanization and technical advancement which is good indicator of development and will lead to increase in overall market size of construction chemical industry.
- In the Union Budget for FY23, the government promoted **PM Gati Shakti initiative** for multi-modal connectivity, wherein the allocation made of Rs. 200 billion will play a key role in development of efficient logistics in the country. The budget also laid down targets to expand National Highways network and lay down conventional roads in hilly areas and enhance metro projects financing. Such announcements made by the government augurs well for construction chemical industry.

• Budgetary Allocation

- In the recent Union budget, the total budgetary allocation for FY23 towards the **Ministry of Housing and Urban Affairs** is Rs. 0.77 trillion. This is an increase of 4% over the revised estimates for FY22.
- The Ministry implements several centrally sponsored schemes, and a few central sector schemes. These include:
 - (i) Pradhan Mantri Awas Yojana – Urban (PMAY-U)
 - (ii) Atal Mission for Rejuvenation and Urban Transformation (AMRUT)
 - (iii) 100 Smart Cities Mission
 - (iv) Swachh Bharat Mission – Urban (SBM-U), and
 - (v) Deendayal Antyodaya Yojana-National Urban Livelihood Mission (DAY-NULM).

The Ministry also develops and manages metro rail projects across the country.

Chart 16: Key allocation by Ministry of Housing and Affairs for FY23

Note: MRTS - Mass Rapid Transit System.

Source: Demand No. 60, Ministry of Housing and Urban Affairs, Union Budget 2022-23

Of the expenditure allocated to the Ministry in FY23, the highest allocation is towards PMAYU at 37 % of the total Ministry's budget followed by allocation to Metro projects at 31%.

This way, the increasing government spending on housing and infrastructure augurs well for the construction chemical industry.

- The National Heritage City Development and Augmentation Yojana (HRIDAY), a central sector scheme launched on 21st January, 2015 and was implemented in 12 cities of Ajmer (Rajasthan), Amaravati (Andhra Pradesh), Amritsar (Punjab), Badami (Karnataka), Dwarka (Gujarat), Gaya (Bihar), Kancheepuram and Velankanni (Tamil Nadu), Mathura and Varanasi (Uttar Pradesh), Puri (Odisha), and Warangal (Telangana). The mission has ended on 31st March, 2019 and no new projects/cities were taken up after 31st March, 2019.

Under the HRIDAY Scheme, funds were not allocated to the cities year wise but for the entire Mission period and directly released to the cities.

From the total fund allocation amounting to Rs. 453.90 crore, the utilized fund amounted as Rs. 322.74 crore as on 31st January 2022.

This scheme exhibits importance given to preserve and revitalize the soul of Indian heritage cities to reflect the city's unique character by encouraging aesthetically appealing, accessible, informative and a secure environment.

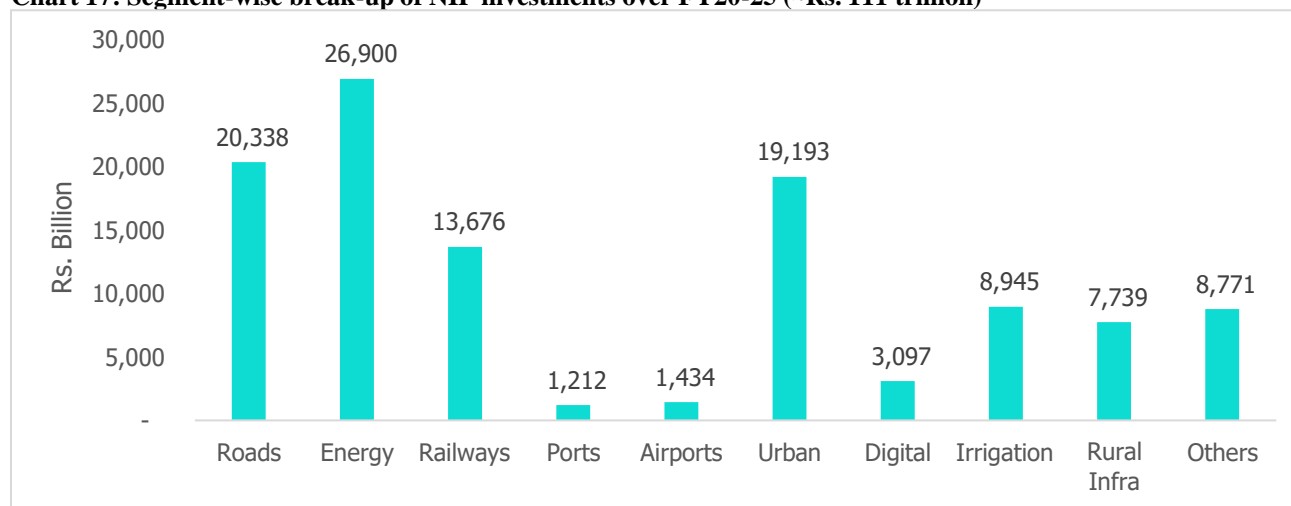

- **National Infrastructure Pipeline (NIP)**

Before the onset of the pandemic the Government of India had unveiled the National Infrastructure Pipeline (NIP) covering various sectors and regions indicating that it is relying on an ‘infrastructure creation’ led revival of the country’s economy. The NIP which covered rural and urban infrastructure entailed investments to the tune of Rs. 111 trillion to be undertaken by the central government, state governments and the private sector during FY20-25.

This in turn is expected to offer significant opportunities to Engineering, Procurement and Construction (EPC) players in India. Significant investment in infrastructure development, real estate will boost construction activities and act as a catalyst for growth of EPC companies in India.

8. Outlook

- The construction chemical market is considerably fragmented. Going forward, the industry is expected to maintain its momentum of growth driven by its untapped potential and growth of construction industry in coming years. With increasing new construction activities and repair and rehabilitation technologies, the demand for construction is likely to make parallel growth.
- The high import cost of construction chemicals brings opportunity for the domestic industry to expand and manufacture greater and more advanced products and solution. This will also help in growth in demand for construction chemicals.
- The 100% FDI in infrastructure sector is likely to boost the construction chemical industry growth. The increased inflow of FDI would certainly help in development, expansion, and growth of the industry. This would eventually lead towards enhancement of quality products and expansion of the industry.
- Government spending has been one of the key drivers of construction industry. The financial constraint of the government has been reduced by several public-private partnerships. This assist in increasing focus on overall infrastructural development. Also, the government policies in support of boosting domestic manufacturing augurs well for industrial development. An all-time high budget allocation towards capital expenditure in FY23 sets a benchmark for government's thrust towards infrastructural development. With such infrastructural as well as industrial development, market for construction chemical is expected to expand.
- With ~Rs. 2 trillion allocations for development of road network in the FY23 and target of expanding national highway coverage upto 25,000 kms, the demand for construction chemical based solutions and ready-mix-concrete can be foreseen to shoot up.

- Growing construction activities triggered by urbanization and development of rural areas is still an untapped area. As per census of India 2011, the urbanization level in India is ~30%. Unitednation estimates that about 416 million people will be added as urban dwellers between the years2018 and 2050. Hence, with progressing urbanization and development activities, usage of construction chemicals is very likely to upswing.
- With growing concern about climate change, its environmental impact on concrete structures generates needs for repairs and renovation solutions. The increase in seismic activities and several occurrence of natural calamities results in major structural damages. Not only this, premature deterioration of building or structures has also raised alarming concern for dire needfor repairs and rehabilitation. Thus, generating modernized and innovative construction chemicalsolution would capture high traction in the coming years for the purpose of longevity and sustainability of the structures.
- Increase in disposable income, rising aspiration of large middle income group and changing demographic provide boost to the demand for construction chemicals from the retail segment.

Our Strengths:

Comprehensive product portfolio

The construction chemical market is considerably fragmented. As per the CareEdge Report, the industry is expected to maintain its momentum of growth driven by its untapped potential and growth of construction industry in coming years. With increasing new construction activities and repair and rehabilitation technologies, the demand for construction is likely to make parallel growth. The high import cost of construction chemicals brings opportunity for the domestic industry to expand and manufacture greater and more advanced products and solution. This will also help in growth in demand for construction chemicals.

We are engaged in the business of manufacturing and sales of modern building materials and construction chemicals. From the development of new buildings by developers to repair of existing buildings by contractors, our products provide a wide range of solutions for modern living. Innovative materials that provide strength, stability, durability and resistance to dampness and water is the ultimate objective of any modern building material. Our modern building materials and construction chemicals portfolio has more than 80 products which are manufactured to provide strength and stability, resistance to dampness and water, durability, comforts and conveniences. Our suite of products includes a range of construction materials and chemicals such as concrete admixtures, tile adhesives & grout, waterproofing system/products, concrete repairs, ready mix mortar, wall finishes and paints, anti-corrosive system/products, engineering grouts & industrial floors and concrete essentials. Our products are marketed and sold under the “MCON” brand.

Diverse customer base

We cater to modern building and development requirements of our clients like developers, civil contractors and architects. We have over the years established relationships with various clients and continue to serve them with our product offerings. We supply our products through market intermediaries like dealers and distributors to institutional customers like builders & developers and large civil & engineering contractors involved in the construction of civil, commercial and infrastructure projects. We play an important role in the entire life cycle of any construction whether it is a new construction where our products such as readymix plasters, tile adhesives, paints, wallputty and block adhesives used for development or in an old and dilapidating building or structure which requires re-enforcements like our micro concrete, polymer mortar, liquid polymers, epoxy mortars, crack fillers and corrosive protection to provide strength and stability to the existing structure.

Strategies:

Greenfield project for increasing our manufacturing capacity near Ambethi, Valsad, Gujarat.

We continue to seek to increase our market and strengthen our position in the industry. We propose to achieve this by setting up a greenfield manufacturing plant at Ambethi, Valsad, Gujarat with a fresh capacity of 18,000 MTPA.

Our Company has already placed an order for the plant and machinery and other equipment required for this expansion. The civil construction required for this expansion is in progress and expected to be completed by Fiscal 2023. The funding requirement for civil construction, purchase of plant and machinery and other equipment for this expansion is Rs. 800 Lakhs and is being met through internal accruals and borrowings from banks.

Further developing our institutional sales business.

We intend to further expand our institutional sales business by developing relationships with large real estate developers, civil and infrastructure contractors and government bodies. We are already empanelled with MCGM, MHADA and CIDCO and we are also supplying our products for use in various projects of these government bodies. We intend to expand our project dealer network by developing relationships with project dealers who supply building materials for infrastructure projects like metro development, flyovers, bridges etc. Civil construction contractors developing projects for large developers have specific requirements for each stage of development. We have products for all stages from the laying of foundation of the building to finishing of the residential or commercial premises. Our suite of products, quality standards and brand MCON lead our efforts in expanding our institutional sales business on a pan-India basis.

Geographical expansion of our distribution network.

We supply our products to more than 100 distributors and dealers which in turn supply them to more than 1300 retailers based in the States of Maharashtra, Gujarat and Rajasthan who serve various developers, contractors and architects in these western regional markets. We intend to expand our product offerings across the country and the overseas markets like Bangladesh where economic development is happening at a fast pace. We have already initiated steps for domestic and overseas expansion and will be participating in an exhibition of building materials to be held in Surat in February 2023, Dhaka in March 2023 and Pune in April, 2023 to be organised by ACETECH REFLECT.

Enhancing the visibility and reach of our brand “MCON”.

“MCON” as a brand has been used by us for most of our products like “MCON Magic Coat WP”, MCON MORTAR/NSA Grey, MCON Block Fix /Block Mortar, MCON Wall Putty and others. We have a multi-pronged branding as well as marketing strategy covering both retail and institutional markets. Our technical team does shop meets outside the retail shops selling our products where contractors are invited so as to can spread the awareness of our products and their use. We conduct consultant and architect meets to make them aware about our products and their use. We participate in exhibitions like the recently concluded World of Concrete 2022 – one of the flagship shows of Las Vegas which was brought to Mumbai. We have generated more than 300 qualified leads from this event.

For better brand recall, we have created  our brand mascot “Mr. M” and we market him as a solution

provider for all construction related challenges. We use this mascot in most of our promotional campaigns as well as our advertising material.

To ensure our reach to the large customers and contractors, we advertise our products and also publish articles in certain construction industry related magazines. These magazines have a wide circulation and reach various construction professionals.

We will continue with our branding and marketing efforts to ensure that our brand is recognised amongst the leading brands in the modern building materials and construction chemicals space. Our branding and marketing efforts will complement the sales and distribution strategies on the ground to ensure maximum benefit from minimum resources.

Expanding our sales and distribution network.

Mcon Rasayan has created a strong foot hold in the western zone of India by its presence in the states of Gujarat, Maharashtra and Rajasthan. The journey to explore outside Mumbai began almost 6 years back when we launched our products in the Pune market. In the year 2021, we decided to penetrate into the north Gujarat territory as well as enter the State of Rajasthan and in a short span we have tied up with 7 distributors in this region and also supplied to

more than 100 contractors our products. Our next phase of expansion in our sales and distribution network is into the states in proximity to our existing network and the obvious choices are Madhya Pradesh as it is approachable from Gujarat as well as Maharashtra & Uttar Pradesh due to its cross-border trade relationship with Rajasthan, Karnataka & Goa as they share border with Maharashtra and Telangana due to the geographical distance advantage as well as the fast development happening in that state and Further, we proposed to expand our sales and distribution network after completion of setting of our proposed manufacturing plant at Ambethi, Valsad, Gujarat.

We have conducted an in-house survey of these markets and their potential for our products. We have also identified potential distributors in few targeted cities through our existing network as well as inquiries received through online platform. We shall soon enter into arrangements with them to enter these markets.

Improve operational efficiency and continue to implement measures to reduce costs.

We have implemented and will continue to implement measures to reduce our operating costs, which is critical in determining profitability. We have, at all times, endeavoured to maintain the price competitiveness of our products. We have and will continue to implement certain efficiency improvement projects, such as, improving utilization rate of our existing facilities and establishing Unit III that would further enhance our cost competitiveness and increase profitability. We intend to continue to focus on increasing our production capacity, improve utilization of our existing capacities and also improve our sales and distribution channels all over the country.

Our Business Operations:

Manufacturing Units

We presently have two (2) manufacturing units in operation situated near Valsad.

Unit I – GIDC Sarigam, Valsad, Gujarat

Our Company established Unit I for the manufacture of Liquid and Powder products in the year 2012. We manufacture admixtures, waterproofing products, concrete repair products, tile adhesives, tile grouts, machine foundation grouts, floor hardeners, wall putty, paint and bonding polymers. The current installed capacity at this unit is 2,500 MTPA.

Unit II – Chikli, Navsari, Gujarat

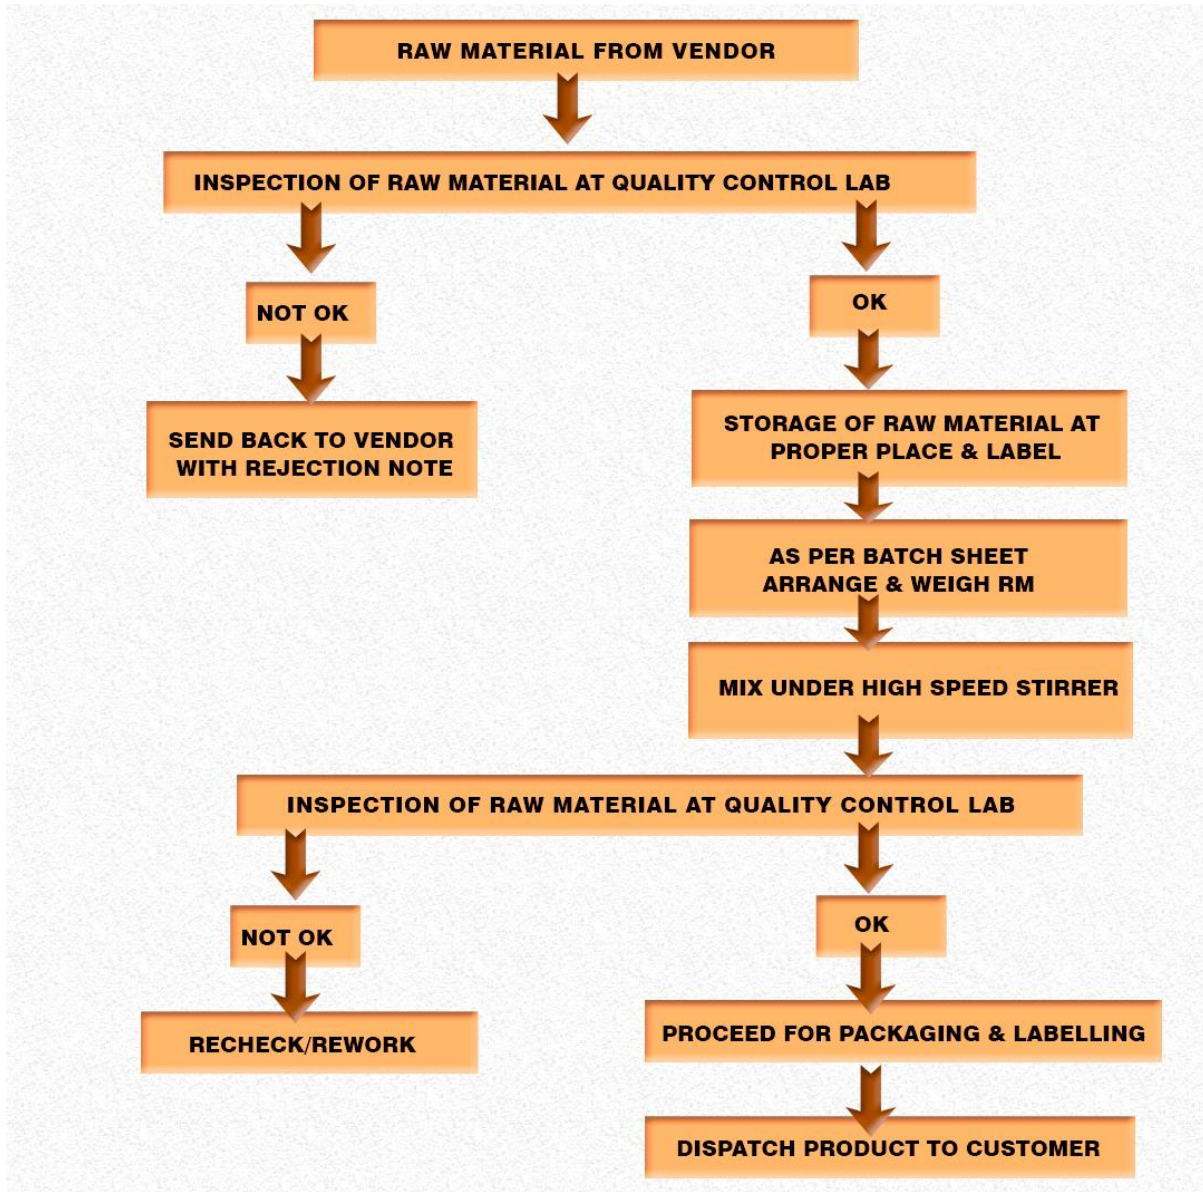

Our Company manufactures Powder Products at Chikli, near Valsad. Unit II manufactures only Powder products like readymix platers, block adhesives and tile adhesives. The current installed capacity at this unit is 12,500 MTPA. This unit has been taken on lease by us and once the Unit III at Ambethi, Valsad, Gujarat achieves full operational potential, we will cease to operate this unit.

Unit III – Ambethi, Valsad, Gujarat (Under construction)

We are expanded our manufacturing capacity by setting up a greenfield facility at Ambethi, Valsad, Gujarat. The land acquired by our Company is 14,729 sq. mtrs. (approx.) and will be developed into two manufacturing lines covering a total area of about 57,883 sq. ft. This unit will be dedicated to manufacture our entire range of Powder and Liquid products with an installed capacity of 18,000 MTPA.

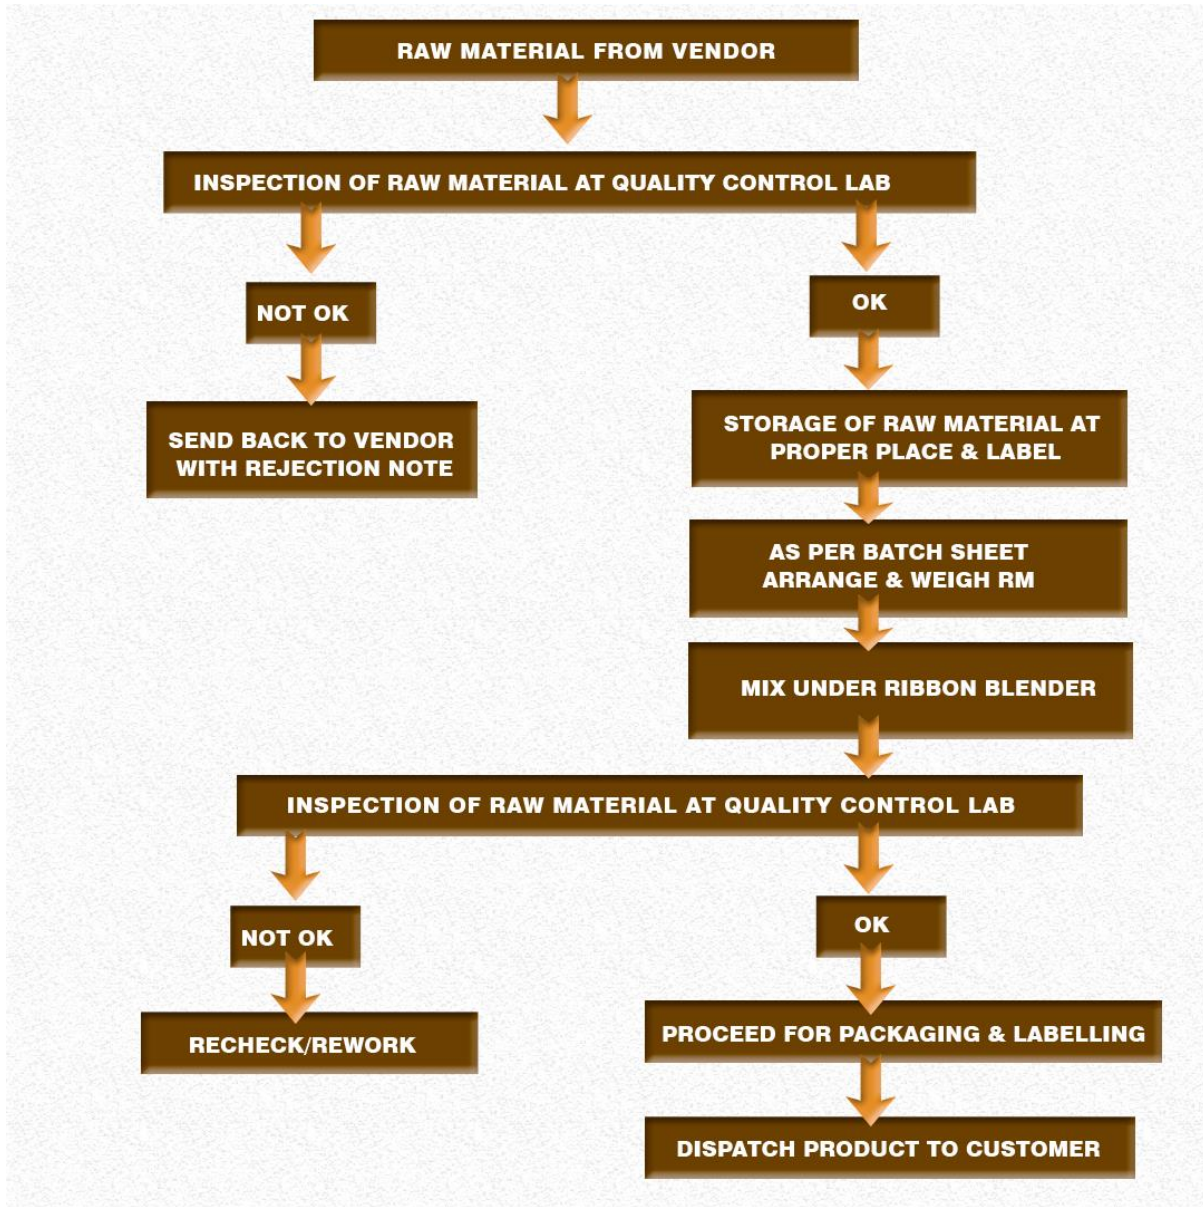

Manufacturing Process - Liquid Products

We have a monthly production plan for the liquid manufacturing. Based on the total quantity to be manufactured of each SKU (Stock Keeping unit), the production team will raise an indent on our purchase department. Our purchase team will procure the relevant raw material taking into consideration the stock in hand, total transit time and MOQ of the material. Once the material is received at our manufacturing unit, our quality control team will test the incoming raw material on parameters defined in the quality plan. The tested and accepted material by the quality control department is taken into stores and issued to our production team as per the batch sheet of the product to be manufactured. The manufacturing process for these products is set-out below:

Manufacturing Process – Powder Products

The major component for manufacturing the powder products like ready plaster, tile adhesives, micro concrete etc. is cement and sand. We ensure to purchase cement from branded cement companies which will ensure the consistent quality of the cement. For the sand, we have our own sand drying and sieving unit to ensure high quality, silt free dry river sand. The right proportion of well graded sand is necessary for manufacturing the right quality product. Once all the raw materials are checked by the quality control team then we follow this flow chart for manufacturing the powder products:

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Except as otherwise stated in this Draft Prospectus and the Risk Factors given in the Draft Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

Apart from in-house transportation facility we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation

strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown, the demand falls which has adverse impact on our business.

Competition

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition.

COVID-19 Pandemic

Since the onset of the COVID-19 pandemic in March 2020, our Company's operations have been affected as our employees faced the threat of getting infected. In 2020, cases of the novel corona virus started rapidly increasing in India, which led the government of India to impose a nationwide lockdown. The spread of Covid-19 and its recent developments have had and might continue to have repercussions across local, national and global economies. To prevent the spread of Covid-19 and to comply with the restrictions, we had to temporarily suspend our operations in order to follow the Government's norms. We continuously monitored the economic conditions and have outlined sufficient measures to combat the pandemic situation at our business premises. Once the lockdown was lifted, our operations restarted in full swing. Initially we did find a little hiccup in finding workers but because of our enterprising organization, we were able to source quality workforce and we were able to train them and we restarted our operations. After lifting the lockdown and resuming our operations the demand in our industry abruptly increased from the different sectors and we attained the highest production during the partial year 2020-21 and FY 2021-22. The demand after pandemic ultimately nullified the impact of shutdown during COVID 19 pandemic. The future impact of COVID-19 or any other severe communicable disease on our business and results of operations depends on several factors including those discussed in the chapter "*Risk Factors*" beginning on page 26. We are continuing to closely monitor the economic conditions and the effect of COVID-19 and have outlined certain measures to combat the pandemic situation and to minimize the impact on our business.

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Draft Prospectus which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, amongst others equity shares. Pursuant to the SEBI UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the SEBI UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020, decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Issue Opening Date. If the Issue is made under UPI Phase III of the UPI Circular, the same will be advertised in shall be advertised in all editions of [●], an English national daily newspaper, in all editions of [●], a Hindi national daily newspaper and in all editions of [●] Marathi national daily, Marathi being the regional language of Mumbai, where our Registered Office is located, each with wide circulation, on or prior to the Issue Opening Date and such advertisement shall also be made available to the Stock Exchange for the purpose of uploading on their websites.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/or payment instructions of the Retail Individual Bidders using the UPI Mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the Lead Manager will be required to compensate the concerned investor.
