MCON DECO FLOOR SYSTEM

MCON DECO FLOOR SYSTEM is an abrasion resistance , decorative solution for external paving popularly also known as Stamped Concrete. MCON DECO Floor system is non conductive, abrasion resistant with attractive colours and designs.

MCON DECO FLOOR System is the result of the enriched experience of the Company in the field of floor hardeners, colored floor hardeners and stamp concrete. Flooring is the one of the most required component of building structure.

Our MCON DECO Floor system is a combination of Concrete, MCON Hard Floor Decor in different colours, MCON DECO Release and MCON DECO Sealer.

We combine the strength of cement with abrasion resistance properties of Floor hardeners and decorate it with stable colours to give your floors the finishing of your imagination.

ADVANTAGES OF MCON DECO FLOOR SYSTEM

- ◆ **Unlimited designs.**
- ◆ **Unlimited colour combinations.**
- ◆ **Tear and wear resistance double than original concrete.**
- ◆ **Easy to install Natural stone look with strength of concrete.**
- ◆ **Out put is more than other system.**
- ◆ **Monolithic pavement.**

OUR PATTERNS YOUR FLOORS

ASHLAR STONE CODE : #1203

BOARD WALK CODE : #1209

HERING BONE CODE : #1206

CIRCULAR GRANITE CODE : #1212

caramel

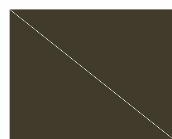

light brown

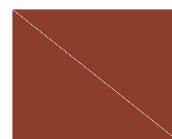

Fransican red

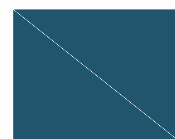

sand

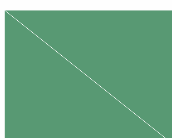

Desert tan

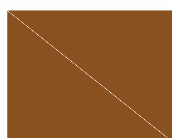

Brick red

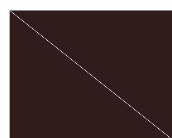

Steel blue

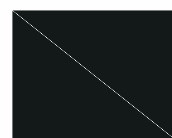

Green

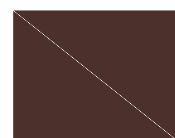

Mexican tile

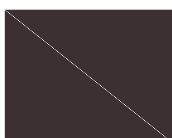

Rust red

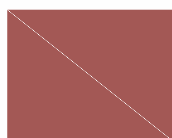

Forest brown

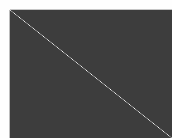

Autumn brown

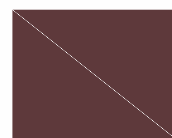

Brown stone

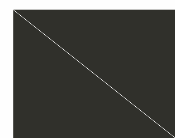

Boka Pink

Sunset grey

Coco Plum

Sonara Tan

MCON DECO FLOOR SYSTEM

APPLICATION

◆ MCON DECO FLOOR SYSTEM :

is concrete that is patterned and/or textured or embossed to resemble brick, slate, flagstone, stone, tile, wood, and various other patterns and textures. Stamped concrete is commonly used for patios, sidewalks, driveways, pool decks, and interior flooring. The ability of stamped concrete to resemble other building materials makes stamped concrete a less expensive alternative to using those other authentic materials such as stone, slate or brick. There are three procedures used in MCON DECO FLOOR SYSTEM which separate it from other concrete procedures; the addition of a colored floor hardener - MCon Hard Floor Decor, the addition of an accent color with MCON DECO RELEASE and stamping a pattern into the concrete.. These three procedures provide stamped concrete with a color and shape similar to the natural building material. It also is longer lasting than paved stone and still resembles the look.

◆ Adding Mcon Hard Floor Decor :

The base color is the primary color used in Mcon Deco Floor System. The base color is chosen to reflect the color of the natural building material. The base color is produced by adding a Mcon Hard Floor Decor - color hardener to the concrete.

◆ Adding Mcon Deco Release :

The accent color is produced by applying Mcon Deco Release to the concrete. The Deco Release color is same as Hard Floor Decor or different which is used to produce a texture and show additional building materials. The Mcon Deco Release has two purposes - a pigment used to give effect to the concrete and a nonadhesive release agent used to prevent the concrete stamps from sticking to the concrete.

◆ Stamping Patterns :

The pattern is the shape of the surface of the stamped concrete. The pattern reflects the shape of the natural building material. The pattern is made by imprinting the concrete shortly after it has been poured with a "concrete stamp". Most modern concrete stamps are made of polyurethane

◆ Sealer Coat :

After stamping and release, the MCON Deco Sealer is applied on the floor to give it gloss, dust proofing and resistance to oil spillages.
