

MCON STEEL RR

RUST REMOVER COAT FOR STEEL REINFORCEMENT

Product Description :-

MCON STEEL RR is a rust treatment which helps in removing adamantly adhering rust . MCON STEEL RR removes the loose rust without losing the strength of metal.

Features & Benefits :-

- Performs rust removal and rust prevention in one operation in mild conditions.
- Improves bond strength of steel with Concrete.
- Treatment can be carried out at site.
- Self-curing.

Areas of Application :-

Reinforcement Bars

Bridges

Steel-Pipeline

Structures

Technical Details :-

Colour	Light Brown
Application	Brush, Roller
Recommended DFT/COAT	20-25 Microns
Specific Gravity	1.2 - 1.3
Surface Dry	1 hour at 30° C
Hard Dry	24 Hrs.
ph	<2

ANTI CORROSIVE SYSTEM

MCON STEEL RR

RUST REMOVER COAT FOR
STEEL REINFORCEMENT

Easy To Apply :-

Surface Preparation :-

- Good surface preparation will help MCON STEEL RR work more effectively.
- Remove excess rust with a stiff, bristled brush. The object of this step is to get any loose or flaking rust off rather than trying to seal it in.

Product Application :-

- Apply STEEL RR with a brush or a roller. Larger surfaces are much easier to roll and brushes work well on smaller surfaces.
- MCON STEEL RR will dry in 20 minutes. After this again move the Wire brush to ensure removal of further rust.
- Once this operation is over, wash the area with Clean water to remove any traces of MCON STEEL RR.

Coverage :-

80 - 85 Sq.ft Per Ltr

Packing :-

1,5 & 20 Ltr

Shelf Life :-

- Please store away from direct sunlight. 12 months from date of manufacturer.

An ISO 9001 : 2015 - An ISO 14001 : 2015 - AN BS OHSAS 45001 : 2018
